

00:01:11 - 00:01:12

Wait for.

00:01:20 - 00:01:22

Point to change the slide.

00:01:23 - 00:01:24

Okay ok.

00:01:24 - 00:01:30

Good morning to all, approve the first and only point on this point.

00:01:32 - 00:01:36

All'Ordine of the Day recalls the hearing of

00:01:36 - 00:01:39

representatives of Children's Health Defense, lawyer Mary Holland

00:01:39 - 00:01:43

president and Dr. Brian Hooker, Scientifically responsible, I

00:01:43 - 00:01:46

address a greeting and thanks and will be

00:01:46 - 00:01:50

felt in the form of free audition within

00:01:50 - 00:01:53

the framework. the cycle of instruction on measures

00:01:53 - 00:01:57

taken to prevent, counteract and contain the spread

00:01:57 - 00:01:58

of the HIV virus.

00:01:58 - 00:02:02

In particular, in the second phase

00:02:02 - 00:02:06

of the epidemiological emergency, in the

00:02:06 - 00:02:09

second wave of the epidemiological emergency

00:02:09 - 00:02:12

and obviously occurred in Italy.

00:02:12 - 00:02:19

The second point is cancelled.

00:02:19 - 00:02:23

The second point of the day was the audition by Professor Giuseppe Ippolito.

00:02:23 - 00:02:30

Unfortunately, for obvious reasons of time and time, it is repeated to a successive settlement.

00:02:30 - 00:02:33

Avverto che nella seduta odierna verranno redatti pubblicati il resoconto

00:02:33 - 00:02:37

stenografico e quello sommario that by the publicity of the

00:02:37 - 00:02:40

works will also be ensured through transmission from the internal

00:02:40 - 00:02:42

circuit of the web TV of the Camera.

00:02:42 - 00:02:47

Such transmission may also be interrupted only temporarily, if the circumstances are appropriate.

00:02:47 - 00:02:53

In addition, the hearing may also be necessary upon request of the hearing, in all or in part secret.

00:02:53 - 00:02:59

In such a case, the stenographic report will nevertheless be drafted and kept in secrecy.

00:02:59 - 00:03:02

The Commission, in the event that it is released later

00:03:02 - 00:03:05

by declassification, will be called to acquire it. Prior to

00:03:05 - 00:03:09

the agreement of the hearing, whether the secretariat has been

00:03:09 - 00:03:12

disposed or disposed at the request of the same hearing.

00:03:13 - 00:03:13

Well well.

00:03:14 - 00:03:16

Ehm.

00:03:16 - 00:03:20

And our audits have portato two brief presentations.

00:03:20 - 00:03:27

They are also slides and have two brief presentations that are also, of course, on the table of works.

00:03:27 - 00:03:31

Well, I two audits have participated and maybe we

00:03:31 - 00:03:34

will say in what form and how also to

00:03:34 - 00:03:37

the Commission of American Inquiry and therefore to the

00:03:37 - 00:03:41

United States Parliament. They will be able to refer

00:03:41 - 00:03:44

in merit to topics that have, of course, also

00:03:44 - 00:03:48

concerned the United States and a topic that has

00:03:48 - 00:03:51

been dealt with all within this Commission. Parliamentary and

00:03:51 - 00:03:54

which, of course, have also been a little subject

00:03:54 - 00:03:58

of our own in particular the risk of audits.

00:03:58 - 00:04:01

We are dealing with the second wave of pandemic

00:04:01 - 00:04:03

that has occurred in Italy.

00:04:06 - 00:04:09

Fano signo with two yes two.

00:04:21 - 00:04:25

Quindi non ho sentito niente fino adesso non ho capito se si è interrotto un certo.

00:04:32 - 00:04:38

Okay, I repeat ehm.

00:04:38 - 00:04:42

The Italian Investigative Commission is facing the second wave

00:04:42 - 00:04:45

of pandemic. Avvenuta in Italy because in Italy there

00:04:45 - 00:04:48

has been a first wave, of course in it.

00:04:49 - 00:04:52

Che è partita diciamo da febbraio

00:04:52 - 00:04:55

a e si è protratta fino

00:04:55 - 00:04:59

all'inizio dell'estate poi con l'estate c'è

00:04:59 - 00:05:02

stata una diminuzione significativa dei contagi

00:05:02 - 00:05:05

e poi noi abbiamo avuto una

00:05:05 - 00:05:08

seconda ondata eh che è iniziata

00:05:08 - 00:05:12

diciamo da settembre ottobre 2000 e

00:05:12 - 00:05:15

venti e e si is protratta

00:05:15 - 00:05:18

diciamo eh fino all'anno nuovo gennaio

00:05:18 - 00:05:21

febbraio i dir del eh 2000

00:05:21 - 00:05:25

e 21 because that can be

00:05:25 - 00:05:25

important.

00:05:25 - 00:05:29

Seven states are also required by the

00:05:29 - 00:05:32

Commission as they participate in an analogous

00:05:32 - 00:05:35

commission of investigation of the American Congress

00:05:35 - 00:05:39

and all within which. I imagine you

00:05:39 - 00:05:42

will discuss some of the scientific aspects

00:05:42 - 00:05:46

with which the United States has faced

00:05:46 - 00:05:49

the pandemic and that I think they

00:05:49 - 00:05:52

can be in the interests of commissioners,

00:05:52 - 00:05:56

and you will also have a chance

00:05:56 - 00:05:58

to introduce them all.

00:05:59 - 00:06:02

I will then give the floor to

00:06:02 - 00:06:04

Italian Senate Commissioners and Members of Parliament

00:06:04 - 00:06:07

of the Chamber of Deputies for subsequent

00:06:07 - 00:06:07

questions.

00:06:08 - 00:06:13

I do the word for the first introduction, thank you still for being here.

00:06:19 - 00:06:23

Thank you 1000 thanks for the opportunity to be who is an honor for us.

00:06:24 - 00:06:31

Yes, Children's Health Defense we have followed very closely what is happening during il.

00:06:34 - 00:06:34

Well well.

00:06:34 - 00:06:36

This is my first slide.

00:06:36 - 00:06:40

It is only to show you that

00:06:40 - 00:06:43

a year ago, on April 25, the

00:06:43 - 00:06:47

President on the basis of the Commission

00:06:47 - 00:06:50

in the U.S. Chamber determined that it

00:06:50 - 00:06:54

was due This laboratory in China has

00:06:54 - 00:06:58

affirmed that this was the source of

00:06:58 - 00:07:01

this pandemic despite the fact that all

00:07:01 - 00:07:05

the time the National The Institute of

00:07:05 - 00:07:09

Health, therefore, the National Institutes of American

00:07:09 - 00:07:12

Health had excluded this theory and in

00:07:12 - 00:07:16

fact had suggested that it could be

00:07:16 - 00:07:18

a natural origin.

00:07:18 - 00:07:21

Therefore, this interpretation is based on a

00:07:21 - 00:07:24

commission that has worked from 2022 to

00:07:24 - 00:07:27

2024 in the House of Representatives. The

00:07:27 - 00:07:30

House of Representatives of the United States

00:07:30 - 00:07:34

asks for confirmation that speed is good

00:07:34 - 00:07:35

or confirmed.

00:07:35 - 00:07:40

Well, and so they published a report of 500 pages about two years ago.

00:07:43 - 00:07:46

And I think it was a great start,

00:07:46 - 00:07:49

at least from my point of view, but

00:07:49 - 00:07:53

I don't believe it is complete and does

00:07:53 - 00:07:56

not answer all the important questions that are

00:07:56 - 00:07:59

lucky about. The US response to the cover

00:07:59 - 00:08:02

or global answer to the cover is a

00:08:02 - 00:08:05

part of this mission. The aim of this

00:08:05 - 00:08:08

report was to prepare ourselves for a potential

00:08:08 - 00:08:09

future pandemic.

00:08:10 - 00:08:13

La Commissione all'interno della Camera negli Stati Uniti

00:08:13 - 00:08:16

è stata piuttosto è stata seguita da eh

00:08:16 - 00:08:20

Brad come vedete qui sulla diapositiva lui non

00:08:20 - 00:08:23

lavora più alla Camera But he was the

00:08:23 - 00:08:26

head of this very important inquiry, and he

00:08:26 - 00:08:30

said that it is his own work the

00:08:30 - 00:08:33

objective. It was about preventing the next pandemic

00:08:33 - 00:08:36

and learning from the lessons learned precisely from

00:08:36 - 00:08:39

how much we have lived.

00:08:39 - 00:08:43

And he says that the outcome of

00:08:43 - 00:08:46

the pandemic was a lack of trust

00:08:46 - 00:08:50

in American leadership through a lack of

00:08:50 - 00:08:53

confidence. Transparency, honesty, integrity and responsibility  
are

00:08:53 - 00:08:57

all values that are necessary to regain

00:08:57 - 00:08:59

confidence in the American government.

00:09:00 - 00:09:04

Who a sinistra you see a

00:09:04 - 00:09:07

copy of the cover of this

00:09:07 - 00:09:11

report from this report from this

00:09:11 - 00:09:14

commission of the House of Representatives

00:09:14 - 00:09:17

then from the American Chamber and

00:09:17 - 00:09:21

as The goal was to help

00:09:21 - 00:09:24

the United States and the world

00:09:24 - 00:09:28

prevent and protect themselves from the

00:09:28 - 00:09:29

upcoming pandemic.

00:09:29 - 00:09:32

I will talk very briefly about

00:09:32 - 00:09:35

some of the conclusions of the

00:09:35 - 00:09:38

results so from this subcommission my

00:09:38 - 00:09:41

colleague Brian. Hooker, the responsible scientist,

00:09:41 - 00:09:44

will then examine in more detail

00:09:44 - 00:09:47

some of the results of this

00:09:47 - 00:09:47

subcommission.

00:09:47 - 00:09:54

It was first discovered that during the lockdown they caused more harm than benefits.

00:09:56 - 00:09:59

First of all, it has caused damage

00:09:59 - 00:10:02

to the economy first and foremost, causing

00:10:02 - 00:10:04

serious harm to people's mental health.

00:10:05 - 00:10:08

There has been an increase of 18% in

00:10:08 - 00:10:11

mental health problems during and lockdown instead of

00:10:11 - 00:10:15

places. Where there was no lockdown, instead there

00:10:15 - 00:10:17

was a reduction in mental health problems.

00:10:17 - 00:10:18

The lockdown.

00:10:18 - 00:10:22

In fact, they have created big problems relative

00:10:22 - 00:10:25

to the development of children, especially small children.

00:10:25 - 00:10:25

These are these.

00:10:25 - 00:10:28

The fact of wearing masks has

00:10:28 - 00:10:31

created problems with adults. development of

00:10:31 - 00:10:34

language, the understanding of emotions and

00:10:34 - 00:10:37

also their participation in the community.

00:10:37 - 00:10:42

They could not go to school, they couldn't go to all'asylum or the nest.

00:10:42 - 00:10:47

It has also had very serious consequences on the health of American physics.

00:10:47 - 00:10:50

Le people who have problems with cancer,

00:10:50 - 00:10:53

diabetes, problems also di reni non potevano

00:10:53 - 00:10:56

recarsi a presso le Visit their doctors

00:10:56 - 00:10:59

because all the general effort of the

00:10:59 - 00:11:02

scientific community was direct to the response

00:11:02 - 00:11:03

to coping.

00:11:04 - 00:11:07

Until 2023 there has been a de

00:11:07 - 00:11:10

facto lockdown even for the people who

00:11:10 - 00:11:13

They were not vaccinated because there were

00:11:13 - 00:11:15

cases, so to speak, of passports.

00:11:15 - 00:11:18

What gave us was the Green Pass, for

00:11:18 - 00:11:20

which then these people could not go to

00:11:20 - 00:11:23

a palestra or go to a hotel, for

00:11:23 - 00:11:23

example.

00:11:24 - 00:11:27

In part, some findings suggested

00:11:27 - 00:11:30

that probably the coping came

00:11:30 - 00:11:33

from a laboratory escape in

00:11:33 - 00:11:36

China was not of zoological

00:11:36 - 00:11:39

origin and therefore had no

00:11:39 - 00:11:40

biological characteristics.

00:11:41 - 00:11:43

He also wrote the five main arguments supporting

00:11:43 - 00:11:46

this theory, that is to say it had

00:11:46 - 00:11:49

biological characteristics that were not found in nature.

00:11:49 - 00:11:52

It was demonstrated that it derived from a

00:11:52 - 00:11:55

single event of transmission to all man, i.e.,

00:11:55 - 00:11:58

it went in contrast with the pandemic precedents

00:11:58 - 00:12:01

in which there have been events of multiple

00:12:01 - 00:12:02

transmission by animals.

00:12:03 - 00:12:06

Also host of the main SARS research laboratory

00:12:06 - 00:12:09

in China, which has a history of research

00:12:09 - 00:12:12

on its functions and conduct. A level of

00:12:12 - 00:12:15

biosecurity inadequate, it was something that had already

00:12:15 - 00:12:18

been seen in the past and was well

00:12:18 - 00:12:18

documented.

00:12:18 - 00:12:22

Moreover, today we know that the people of

00:12:22 - 00:12:25

all'Istituto di Virologia di Wuhan if they were

00:12:25 - 00:12:28

already sick with a virus It is very

00:12:28 - 00:12:32

similar to the autumn of 2019, so months

00:12:32 - 00:12:35

before a 2020 pandemic was announced in March.

00:12:36 - 00:12:37

So if they were sick first.

00:12:40 - 00:12:43

Finally, another conclusion was that if

00:12:43 - 00:12:46

there were state evidence proving a

00:12:46 - 00:12:49

natural origin, this would have emerged.

00:12:50 - 00:12:56

So if there was a natural origin of this virus in China, we will have it now.

00:12:57 - 00:13:00

Furthermore, the report also guards all WHO

00:13:00 - 00:13:03

organization's Directorate of World Health, which was

00:13:03 - 00:13:07

fundamental in addressing responses to pandemics during

00:13:07 - 00:13:10

the fifth year. The social distancing the

00:13:10 - 00:13:13

obligation of mask and restrictions from a

00:13:13 - 00:13:16

point of view of mobility and Di

00:13:16 - 00:13:19

viaggi e i lockdown in some especially

00:13:19 - 00:13:23

le le measure relative also all cases

00:13:23 - 00:13:25

and all residences for the elderly.

00:13:26 - 00:13:29

It has also analyzed all the

00:13:29 - 00:13:31

information that is state-of-the-art and diffused

00:13:31 - 00:13:34

by the WHO which was often

00:13:34 - 00:13:35

incorrect.

00:13:37 - 00:13:40

During the administration and in

00:13:40 - 00:13:42

January 2000 and 25 the

00:13:42 - 00:13:45

current administration and if it

00:13:45 - 00:13:48

is announced, the administrator has

00:13:48 - 00:13:51

announced that it would In

00:13:51 - 00:13:54

January of this year, the

00:13:54 - 00:13:57

United States officially left the

00:13:57 - 00:13:58

WHO.

00:13:59 - 00:14:02

In particular, I think of speaking who with

00:14:02 - 00:14:06

you at a time of censorship of the

00:14:06 - 00:14:09

concept of censorship and then the United States

00:14:09 - 00:14:13

in the first amendment to the Parliament of

00:14:13 - 00:14:16

the exercise. Freedom of speech, freedom of the

00:14:16 - 00:14:19

press and religion etc. However, during this period

00:14:19 - 00:14:23

we have seen some of the greatest suppressions

00:14:23 - 00:14:26

and threats to society. All the information and

00:14:26 - 00:14:29

this freedom we've ever seen in the United

00:14:29 - 00:14:33

States Children's Health Defense so my organization has

00:14:33 - 00:14:36

been censored on all platforms. We have social

00:14:36 - 00:14:40

networks and in particular with Robert Kennedy Jr.

00:14:40 - 00:14:43

so we are eliminated by Instagram, Facebook, YouTube

00:14:43 - 00:14:46

and even what was once called Twitter.

00:14:47 - 00:14:50

And so we have been eliminated from all these

00:14:50 - 00:14:54

platforms and we have denounced especially the companies that

00:14:54 - 00:14:57

we believed were in agreement with the Government in

00:14:57 - 00:15:00

this because according to the Prime Minister. The Government

00:15:00 - 00:15:04

cannot suppress the freedom of speech of any American,

00:15:04 - 00:15:07

except Clearly, there are some very specific categories that

00:15:07 - 00:15:10

can put people in danger in a very direct

00:15:10 - 00:15:11

way.

00:15:11 - 00:15:14

Therefore, we have denounced, as I said,

00:15:14 - 00:15:18

some of these companies and many of

00:15:18 - 00:15:21

them and in particular and especially the

00:15:21 - 00:15:25

Social media companies and social networks are

00:15:25 - 00:15:28

responsible government officials who worked in.

00:15:28 - 00:15:31

Together with these social media there is

00:15:31 - 00:15:34

a case in particular still open, which

00:15:34 - 00:15:37

ehm has managed this case an antitrust

00:15:37 - 00:15:40

case because suppriming just the possibility of.

00:15:40 - 00:15:43

Freedom of speech for voices smaller than ours.

00:15:46 - 00:15:53

Essentially, it came to be screditate as ehm, sources of information.

00:15:53 - 00:15:58

This is a case in particular, Missouri versus Biden.

00:15:58 - 00:16:01

Two American states, Missouri and Louisiana,

00:16:01 - 00:16:05

have denounced the opening of a

00:16:05 - 00:16:08

case against the Biden administration as

00:16:08 - 00:16:10

people and some bureaucrats.

00:16:10 - 00:16:13

Some people all within the administration said

00:16:13 - 00:16:15

their own on social media, they said

00:16:15 - 00:16:18

Facebook, they said Twitter to censor people.

00:16:18 - 00:16:21

In the process in which we have discovered.

00:16:21 - 00:16:24

So during this case these emails came out that

00:16:24 - 00:16:27

is not a doubt that the Administration was directly

00:16:27 - 00:16:30

involved and said directly to these social media you

00:16:30 - 00:16:33

must take this information from your platforms.

00:16:34 - 00:16:37

And it was also said to these platforms that

00:16:37 - 00:16:41

I would risk in particular Facebook you need to

00:16:41 - 00:16:44

remove this information even if it were veritiere if

00:16:44 - 00:16:47

you created what they called one. Quindi dicevano proprio

00:16:47 - 00:16:50

questo, although this information is True as what we

00:16:50 - 00:16:54

said about Children's Health Defense, it is not censored.

00:16:54 - 00:17:01

Because the most important thing is that the public faces  
vaccination against Facebook.

00:17:01 - 00:17:04

We have therefore opened a case against Facebook

00:17:04 - 00:17:08

and these are decisions of 2021 in which

00:17:08 - 00:17:11

the Federal District Court said that no. It

00:17:11 - 00:17:14

was plausible that the government would tell Facebook

00:17:14 - 00:17:18

what to do, that Facebook believed that in

00:17:18 - 00:17:21

this censorship it was in the public interest.

00:17:21 - 00:17:23

It was not so, but of course.

00:17:23 - 00:17:26

Mark Zuckerberg, the founder of Facebook,

00:17:26 - 00:17:29

has participated in a public podcast

00:17:29 - 00:17:32

and admitted that the government I

00:17:32 - 00:17:35

was pressuring them and they knew

00:17:35 - 00:17:38

that they felt they had no

00:17:38 - 00:17:41

other option if not censoring this

00:17:41 - 00:17:41

information.

00:17:42 - 00:17:43

Unfortunately, we did not win in this case.

00:17:43 - 00:17:46

But we knew it was true, that it was exactly so.

00:17:46 - 00:17:50

Fortunately, in a decision that is concluded

00:17:50 - 00:17:53

last month or so, in this case.

00:17:53 - 00:17:56

Missouri against Biden, if it is concluded

00:17:56 - 00:17:59

with what is called the decree of

00:17:59 - 00:17:59

consensus.

00:17:59 - 00:18:07

This goes against Facebook, Instagram and then Twitter and LinkedIn.

00:18:09 - 00:18:13

What they shouldn't absolutely do if it is a decree,

00:18:13 - 00:18:16

they must not censor information as in the manner in

00:18:16 - 00:18:20

which they did when they were from the Committee. A

00:18:20 - 00:18:23

different administration with a different philosophy in it the next

00:18:23 - 00:18:27

Administration with this decision will have an impact anyway even

00:18:27 - 00:18:30

if the Administration should change. So this is a decision

00:18:30 - 00:18:34

against the administrators during the Biden Administration and an agreement

00:18:34 - 00:18:37

has been reached in the end, but it has been

00:18:37 - 00:18:39

recognized that it was done so.

00:18:39 - 00:18:42

There is another case in progress on

00:18:42 - 00:18:45

the suppression, especially of medical opinions. He

00:18:45 - 00:18:48

expressed his own opinion against the lockdown,

00:18:48 - 00:18:50

saying it could be dangerous.

00:18:50 - 00:18:56

These people are state radiate and they have not been allowed to express their opinions.

00:18:56 - 00:18:59

Another of the topics we will have to deal

00:18:59 - 00:19:02

with in the future is that there probably won't

00:19:02 - 00:19:06

be people responsible for the government who will say

00:19:06 - 00:19:09

what to do all the social media, rather that

00:19:09 - 00:19:12

this censorship will continue. Through these algorithms, there was

00:19:12 - 00:19:15

no need for the presence of such people on

00:19:15 - 00:19:19

the part of the Government who said what to

00:19:19 - 00:19:22

do and we also talked about the situation in

00:19:22 - 00:19:25

hospitals. Hospitals are heavily reimbursed in case of diagnosis

00:19:25 - 00:19:29

of Covip per ogni diagnosi di COVIPs, therefore, sometimes

00:19:29 - 00:19:32

the diagnosis of COVIP was swollen even if not

00:19:32 - 00:19:32

necessary.

00:19:32 - 00:19:38

For this reason, the US response is not sufficient.

00:19:38 - 00:19:42

As I said, the report according to me goes in the

00:19:42 - 00:19:45

right direction and this report that also speaks of this  
censorship

00:19:45 - 00:19:49

we believe will go in the right direction but the doctor

00:19:49 - 00:19:52

Fauci this is a very important topic for us and Dr.

00:19:52 - 00:19:55

Fauci who is the one who has carried forward the answer

00:19:55 - 00:19:59

in the United States was but the decision maker and the

00:19:59 - 00:20:02

last day of the Biden Administration he was dated he has

00:20:02 - 00:20:05

been given an eh thanks in condition that was retroactive this

00:20:05 - 00:20:09

is a very important thing. Unusual is something that does,  
relates

00:20:09 - 00:20:12

to everyone and refers to all the period. In 2014, he

00:20:12 - 00:20:15

spent all the time within the National Institutes of Health.

00:20:15 - 00:20:16

This is very unusual.

00:20:17 - 00:20:20

Furthermore, as regards the United States, what

00:20:20 - 00:20:24

has happened is the declaration of emergency

00:20:24 - 00:20:27

for Covip. It is still present today

00:20:27 - 00:20:30

and will last until 2000-29, so these

00:20:30 - 00:20:33

emergency measures can still be put in

00:20:33 - 00:20:34

place.

00:20:34 - 00:20:44

The declaration of an emergency Covip is the case all within a  
very extensive act.

00:20:46 - 00:20:50

It originated in a 2005 law.

00:20:52 - 00:20:55

Children's Health Defense recently published a

00:20:55 - 00:20:58

resolution that we call Covip. Justice

00:20:58 - 00:21:01

resolution and the resolution for justice

00:21:01 - 00:21:03

can also be found online.

00:21:03 - 00:21:06

We can translate it into Italian if we were to help.

00:21:06 - 00:21:09

We believe that the answer to this

00:21:09 - 00:21:12

question has produced the most extensive suspension

00:21:12 - 00:21:15

of civil liberties in modern American history.

00:21:16 - 00:21:19

Emergencies must not violate the Constitution and should not

00:21:19 - 00:21:23

suspend the Constitution, this is what we believe so

00:21:23 - 00:21:26

we would like our Congress to do. declared that

00:21:26 - 00:21:30

he would never put similar measures into effect because

00:21:30 - 00:21:33

they were so harmful to the well-being of persons

00:21:33 - 00:21:37

and violated our Constitution. riferisco appunto ai mandati al

00:21:37 - 00:21:40

al all'obbligo di mascherina i lockdown la chiusura delle

00:21:40 - 00:21:44

scuole e gli ordini di restare a casa then

00:21:44 - 00:21:47

All the measures we have seen in the United

00:21:47 - 00:21:51

States and also in so many other countries clearly

00:21:51 - 00:21:54

Last but not last this is a quote from

00:21:54 - 00:21:58

a famous author. American is never afraid to raise

00:21:58 - 00:22:01

your voice for the truth. Compassion against injustice, greed

00:22:01 - 00:22:02

and deception.

00:22:02 - 00:22:06

If everyone in the world faced this, it would really change the world.

00:22:07 - 00:22:10

So I am very happy that you

00:22:10 - 00:22:13

are working just to find this justice

00:22:13 - 00:22:16

and this justice. Truth against in, against

00:22:16 - 00:22:18

injustice that has been perpetrated.

00:22:18 - 00:22:21

We believe this is a struggle that we must carry forward all together.

00:22:22 - 00:22:31

After this audition and after this first presentation, I am clearly available for your questions.

00:22:31 - 00:22:33

I thank you once again.

00:22:36 - 00:22:38

Please, Dr. Hooker.

00:22:51 - 00:22:52

May have the next.

00:22:54 - 00:22:55

Can I get my presentation?

00:22:57 - 00:22:59

There should be a separate presentation.

00:23:04 - 00:23:05

Okay ok.

00:23:11 - 00:23:15

Thank you, almost thank you.

00:23:19 - 00:23:21

Honourable senators and deputies, distinguished members

00:23:21 - 00:23:24

of the Commission, we thank you

00:23:24 - 00:23:26

for giving us the opportunity to

00:23:26 - 00:23:27

speak.

00:23:27 - 00:23:34

Today, my name is Brian Hooker and I am the Scientific Head of Children's Health Defense.

00:23:34 - 00:23:37

I am who in the capacity of supporter

00:23:37 - 00:23:40

of public health policies based on concrete data

00:23:40 - 00:23:43

that atting a study. Submit a parity review,

00:23:43 - 00:23:47

official data and testimonials presented in the Parliamentary

00:23:47 - 00:23:47

Inchieste.

00:23:47 - 00:23:50

The objective is simple to assist the Commission

00:23:50 - 00:23:53

in examining two central pillars of the response

00:23:53 - 00:23:55

to the 19th lockdown on mass vaccination.

00:23:56 - 00:23:59

Taking into consideration the data of the real world rather

00:23:59 - 00:24:03

than models or hypotheses, a clear and disturbing picture emerges.

00:24:03 - 00:24:06

None of the two policies has brought about the

00:24:06 - 00:24:09

reduction promise of the total number of The death

00:24:09 - 00:24:11

and both seemed to have contributed to causing unnecessary

00:24:11 - 00:24:12

damage.

00:24:12 - 00:24:15

I would like to start talking about the lockdown in

00:24:15 - 00:24:18

2020 and governments all over the world, including Italy.

00:24:20 - 00:24:21

The next.

00:24:22 - 00:24:25

As I said, in 2020 the

00:24:25 - 00:24:28

governments of all the world, including

00:24:28 - 00:24:30

Italy, have imposed taxes. Unprecedented restrictions

00:24:30 - 00:24:33

on circulation, education, work and social

00:24:33 - 00:24:33

life.

00:24:33 - 00:24:38

Supporters of these measures argued that they would appease the curve and save human lives.

00:24:38 - 00:24:42

However, with a careful and rigorous analysis, the story appears to be different.

00:24:42 - 00:24:44

The Commission of Investigation of the United

00:24:44 - 00:24:46

States Congress on Managing 19 has examined

00:24:46 - 00:24:49

the impact of the lockdown and concluded

00:24:49 - 00:24:49

that.

00:25:00 - 00:25:03

Thank you, therefore, not only for damaging the

00:25:03 - 00:25:06

economy and fundamental rights, but also for physical

00:25:06 - 00:25:09

and mental health of all children's education and

00:25:09 - 00:25:10

development.

00:25:10 - 00:25:13

Il lockdown non basati sulle evidenze scientifiche per contenere

00:25:13 - 00:25:16

il 19 have caused more harm than benefit.

00:25:16 - 00:25:19

The former director of GH, Dr. Francis Collins, has admitted that if

00:25:19 - 00:25:23

he attributes an infinite value to the end of illness and others.

00:25:23 - 00:25:26

to save a life, while if it attributes a value par zero

00:25:26 - 00:25:30

to the fact that this completely disrupts the lives of people,  
ruins

00:25:30 - 00:25:33

The economy is to have many children away from school in a

00:25:33 - 00:25:37

mode, in a way from which they are never completely recovered.

00:25:37 - 00:25:39

The report of the United States

00:25:39 - 00:25:42

Congressional Commission documents how a prolonged

00:25:42 - 00:25:44

lockdown has unnecessarily damaged the U.S.

00:25:44 - 00:25:45

economy.

00:25:47 - 00:25:49

More than 160,000 companies have closed 60%

00:25:49 - 00:25:52

of these shutdowns, which then became definitive.

00:25:52 - 00:25:55

I cups of unemployment are rising at

00:25:55 - 00:25:58

levels comparable to those of the Great

00:25:58 - 00:25:58

Depression.

00:25:59 - 00:26:03

Generalized restrictions have been given priority on the  
protection of the most vulnerable.

00:26:04 - 00:26:09

Ulteriori diapositive describe in detail the serious consequences for American mental health.

00:26:12 - 00:26:16

I also emphasize the interruption of the development of children

00:26:16 - 00:26:19

and young adults, as well as serious ones. Impacts on

00:26:19 - 00:26:22

physical health caused by delay in care and interruption of

00:26:22 - 00:26:23

services.

00:26:23 - 00:26:26

Finally, despite the lack of any

00:26:26 - 00:26:29

scientific basis, vaccine passports have become

00:26:29 - 00:26:32

a de facto lockdown for non-vaccinated

00:26:32 - 00:26:32

Americans.

00:26:33 - 00:26:36

Now, to verify the cardinal statement

00:26:36 - 00:26:38

according to which Lockdown have reduced

00:26:38 - 00:26:41

mortality, we can cross and data

00:26:41 - 00:26:43

on total mortality in excess of

00:26:43 - 00:26:44

2020.

00:26:45 - 00:26:48

Given the world's points in data

00:26:48 - 00:26:51

with those of the Oxford University

00:26:51 - 00:26:54

Lockdown Index, the result is unambiguous.

00:26:54 - 00:26:58

This point is a graph that shows

00:26:58 - 00:27:01

this analysis and the result is unmistakable

00:27:01 - 00:27:05

in The most severe lockdown has been

00:27:05 - 00:27:08

correlated with a lower total mortality.

00:27:10 - 00:27:12

On the contrary, in any combination.

00:27:13 - 00:27:16

The fifth combination at the global level is Europe

00:27:16 - 00:27:20

plus the United States per level of reddito, dimensione

00:27:20 - 00:27:23

della popolazione, densità della popolazione, densità di cittadini anziani.

00:27:23 - 00:27:31

Mortality in excess remains stable or increases modestly and moderately.

00:27:32 - 00:27:35

These models were already visible in the first months of

00:27:35 - 00:27:39

2020 and have since been confirmed by numerous environmental studies.

00:27:39 - 00:27:43

The lockdown has not saved lives in terms

00:27:43 - 00:27:47

of net, spostatato and in many cases amplificato

00:27:47 - 00:27:50

and decessi. due to the delay in life-saving

00:27:50 - 00:27:53

care, mental health crises and economic outcomes.

00:27:54 - 00:27:56

And this is not an analysis a posteriori.

00:27:56 - 00:27:59

World Health Organization (WHO)

00:27:59 - 00:28:03

estimates 14.9 million deaths

00:28:03 - 00:28:06

in excess by 2020.

00:28:06 - 00:28:09

At least 5.2 million

00:28:09 - 00:28:12

children have lost a

00:28:12 - 00:28:15

parent or reference figure

00:28:15 - 00:28:19

in the United States.

00:28:19 - 00:28:22

The Congressional Commission of Inquiry on the Management of

00:28:22 - 00:28:26

19th, also known as the Owens Trap Report, has

00:28:26 - 00:28:29

documented that I The lockdown has inflicted incommensurable damage

00:28:29 - 00:28:32

to mental health, child development and physical well-being.

00:28:33 - 00:28:40

In Italy, the state has registered tens of thousands of deaths in excess not legati al.

00:28:42 - 00:28:45

Along with a sharp increase

00:28:45 - 00:28:47

in psychiatric and pediatric emergencies,

00:28:47 - 00:28:49

suicide attempts and eating disorders.

00:28:50 - 00:28:54

The human cost that does not arise, especially for

00:28:54 - 00:28:57

children and vulnerable people, requires us to recognize everything.

00:28:57 - 00:29:00

This is to ensure that future emergencies are handled

00:29:00 - 00:29:03

with proportionality and respect for constitutional rights.

00:29:04 - 00:29:06

Now let's go to vaccination.

00:29:07 - 00:29:12

The policy presented as the final solution.

00:29:13 - 00:29:17

The evidence presented to this Commission parallel

00:29:17 - 00:29:20

investigations in the United States and Germany

00:29:20 - 00:29:23

showed that vaccines against 19 have not

00:29:23 - 00:29:27

been respected by themselves. Objective statements and,

00:29:27 - 00:29:30

more seriously, could be linked to an

00:29:30 - 00:29:34

increase in general mortality once some important

00:29:34 - 00:29:36

methodological bias are corrected.

00:29:36 - 00:29:38

First of all, the substantial claim that

00:29:38 - 00:29:40

vaccines would block its transmissions, thus justifying

00:29:40 - 00:29:43

the vaccine obligation and the green pass.

00:29:44 - 00:29:47

This thesis is soon broken down

00:29:47 - 00:29:49

on the original illustrative foglietto of

00:29:49 - 00:29:51

the phaser and its successive ones.

00:29:51 - 00:29:57

The prevention of transmission has never been declared because it is not tried.

00:29:59 - 00:30:06

The leader of Pfizer openly admitted it before the European Parliament on 11 October 2022.

00:30:08 - 00:30:11

The European Medicines Agency has confirmed

00:30:11 - 00:30:14

the same thing in front of

00:30:14 - 00:30:17

14 MEPs 18 October 2023 and

00:30:17 - 00:30:21

the Aifa has confirmed it through

00:30:21 - 00:30:24

a FOIA request in August 2024.

00:30:25 - 00:30:27

Without proof of a reduction in

00:30:27 - 00:30:30

transmission, the legal and scientific basis

00:30:30 - 00:30:33

for vaccine obligation is gone.

00:30:33 - 00:30:34

Even worse.

00:30:34 - 00:30:38

Various studies, including the report on the concentration

00:30:38 - 00:30:41

in Massachusetts of the United States CDC from

00:30:41 - 00:30:44

July 2021 and the subsequent work carried out

00:30:44 - 00:30:48

by NAS and others in the journal Science

00:30:48 - 00:30:51

have demonstrated that people who were vaccinated had

00:30:51 - 00:30:55

equal or higher rates of infection and transmission.

00:30:56 - 00:30:59

Secondly, as you can see in the slide, the virus itself

00:30:59 - 00:31:02

was much less lethal than predicted by the first models.

00:31:03 - 00:31:06

I data of the Istat for 2020

00:31:06 - 00:31:09

and early 2021 have documented a number

00:31:09 - 00:31:12

of Deaths under 50 years, lower than

00:31:12 - 00:31:14

the average of five previous years.

00:31:15 - 00:31:21

I deaths medi per se are verified in persons over the age of eighty with more than three comorbidities.

00:31:24 - 00:31:27

It was already known that the PCR

00:31:27 - 00:31:30

test used with cicli soglia elevati was

00:31:30 - 00:31:33

unreliable and this because it detected fragments

00:31:33 - 00:31:36

of common viruses in RNA.

00:31:36 - 00:31:39

In this way, inflating the number of cases,

00:31:39 - 00:31:43

a German serological verification has estimated that It

00:31:43 - 00:31:46

is estimated that only about 14% of cases

00:31:46 - 00:31:49

are diagnosed with a true infection caused by

00:31:49 - 00:31:49

SARS.

00:31:50 - 00:31:50

Two two.

00:31:53 - 00:31:57

Third, the surveillance of adverse events is shown to be terribly inadequate.

00:31:58 - 00:32:01

I passive systems have underestimated

00:32:01 - 00:32:04

the suspicious reactions of about

00:32:04 - 00:32:06

1000 times compared to the

00:32:06 - 00:32:09

active surveillance used than trial

00:32:09 - 00:32:10

registered.

00:32:10 - 00:32:12

Even serious events such as

00:32:12 - 00:32:15

myocarditis, diagnosed according to the

00:32:15 - 00:32:18

Brighton criteria, are underestimated by

00:32:18 - 00:32:20

more than three orders of

00:32:20 - 00:32:21

greatness.

00:32:23 - 00:32:26

Even when a serious adverse event is,

00:32:26 - 00:32:29

the official algorithm of causality of the

00:32:29 - 00:32:33

WHO applies criteria so rigid that Declasse

00:32:33 - 00:32:36

further or discard many almost likely correlates

00:32:36 - 00:32:39

to the vaccine, thus leading to a

00:32:39 - 00:32:41

serious underestimation of damage.

00:32:48 - 00:32:52

As for the vaccine AstraZeneca, which has been

00:32:52 - 00:32:56

widely distributed and administered in Italy from February

00:32:56 - 00:32:59

2021, before being limited to those over 60

00:32:59 - 00:33:02

years of age in June 2021.

00:33:02 - 00:33:10

A preprint of whom I am a co-author, which will soon be published on an indexed journal in PubMed.

00:33:11 - 00:33:14

A secondary analysis of security on

00:33:14 - 00:33:17

an extensive bank data in English

00:33:17 - 00:33:21

that included more than 46 million

00:33:21 - 00:33:24

participants from the studies available to

00:33:24 - 00:33:27

authorities. 2022, demonstrates that the AstraZeneca

00:33:27 - 00:33:31

product carried a significantly higher risk

00:33:31 - 00:33:34

of general mortality than Pfizer's mRNA

00:33:34 - 00:33:34

vaccine.

00:33:35 - 00:33:38

I compared direct omissions from

00:33:38 - 00:33:42

the original publications that were

00:33:42 - 00:33:45  
published in 2022, and revealed

00:33:45 - 00:33:48  
a rate of death rates

00:33:48 - 00:33:51  
equal to 1.545, 54% In

00:33:51 - 00:33:55  
addition to the vaccine AstraZeneca,

00:33:55 - 00:33:58  
together with elevated risk of

00:33:58 - 00:34:01  
myocardial infarction, stroke, thrombosis and

00:34:01 - 00:34:03  
other cardiovascular events.

00:34:05 - 00:34:12  
However, the vaccine remains on the market in the European Union  
until March 2024.

00:34:13 - 00:34:16  
And this is not if it

00:34:16 - 00:34:19  
intends to suggest that in some

00:34:19 - 00:34:22  
way the Pfizer vaccine was safe

00:34:22 - 00:34:25  
even in passive surveillance systems. The

00:34:25 - 00:34:28  
adverse event reporting system in the

00:34:28 - 00:34:31

United States has 24,500 deaths as

00:34:31 - 00:34:34

a result of vaccine administration.

00:34:34 - 00:34:41

Fischer Biotech, as di contro il 19 in February 2026.

00:34:42 - 00:34:45

We know that this data reflects from

00:34:45 - 00:34:48

one to 10% of the actual number

00:34:48 - 00:34:50

of people. deaths due to serious underestimation

00:34:50 - 00:34:53

by doctors in the database of volunteer

00:34:53 - 00:34:54

buyers.

00:34:56 - 00:34:59

The most important aspect now for this commission is that vaccination against

00:34:59 - 00:35:02

19 has not reduced mortality in the medium and long term.

00:35:03 - 00:35:06

The most reliable evidence indicates that the

00:35:06 - 00:35:09

increase and this perception of benefit derives

00:35:09 - 00:35:11

from at least four main bias.

00:35:12 - 00:35:16

Il bias del tempo immortale, il bias della finestra di conteggio dei casi.

00:35:17 - 00:35:20

Il bias dei vaccinati sani e l'effetto Harvest effect

00:35:20 - 00:35:23

mietitura, in addition to the fact That if you

00:35:23 - 00:35:26

affidavit your mathematical models, you would not validate them

00:35:26 - 00:35:29

rather than data that is not elaborated.

00:35:29 - 00:35:33

So, if you correct these bias, the picture changes radically.

00:35:35 - 00:35:39

Due studies of the Italian court based

00:35:39 - 00:35:42

on their official demographic data relating to

00:35:42 - 00:35:46

Pescara and all other provinces. The entire

00:35:46 - 00:35:49

Emilia Romagna region proved this even after

00:35:49 - 00:35:51

a partial correction of bias.

00:35:53 - 00:35:57

Environmental studies have reinforced this signal.

00:35:57 - 00:36:01

These are the countries that have been

00:36:01 - 00:36:04

analyzed precisely as regards mortality on the

00:36:04 - 00:36:08

Y axis and the percentage of people

00:36:08 - 00:36:11

vaccinated. On the side of X, and

00:36:11 - 00:36:15

if you see that precisely mortality is

00:36:15 - 00:36:18

increased at the moment in which there

00:36:18 - 00:36:21

are more vaccinated in the population.

00:36:24 - 00:36:27

Ora gli studi di coro e altri

00:36:27 - 00:36:30

utilizzando che hanno utilizzato i dati completi

00:36:30 - 00:36:33

del censimento dell'OMS, hanno documentato un A

00:36:33 - 00:36:36

paradoxical increase in 19 deaths during the

00:36:36 - 00:36:39

vaccination era, especially in high coverage regions.

00:36:39 - 00:36:47

Australia has recorded a strong peak of mortality in excess after the introduction of 2021.

00:36:49 - 00:36:53

In Germany, the ex-toxicologist head of Pfizer

00:36:53 - 00:36:57

Europe, Dr. Helmut Stern, has testified under

00:36:57 - 00:37:01

oath before the commission of Inchiesta sul

00:37:01 - 00:37:04

coronavirus del Bundestag il 19 marzo 2026,

00:37:04 - 00:37:08

che il processo di approvazione ha omesso

00:37:08 - 00:37:12

studi Essential and that the post-marketing data

00:37:12 - 00:37:15

indicated tens of thousands of deaths associated

00:37:15 - 00:37:17

with the vaccine.

00:37:18 - 00:37:20

These results are not isolated.

00:37:21 - 00:37:24

Convergono instead by independent researchers.

00:37:24 - 00:37:27

Official data and testimonials of addetti ai lavori.

00:37:29 - 00:37:32

Independent researchers must face a tough battle

00:37:32 - 00:37:35

because the biggest set of data on

00:37:35 - 00:37:39

vaccine safety remains. owners and inaccessible, as

00:37:39 - 00:37:42

well as controlled by producers or agencies

00:37:42 - 00:37:45

that have profound links with the industry.

00:37:45 - 00:37:52

So, what concrete measures can the Italian Senate take to prevent such errors in the future?

00:37:53 - 00:37:56

Primo richiedere that for every deceased

00:37:56 - 00:37:59

person and for every serious adverse

00:37:59 - 00:38:03

event systematically report the vaccine status,

00:38:03 - 00:38:06

or the number of doses received.

00:38:09 - 00:38:12

Register adverse reactions starting from the

00:38:12 - 00:38:14

day of each vaccination and not

00:38:14 - 00:38:17

after an arbitrary period that can

00:38:17 - 00:38:20

go from seven to 14 days.

00:38:20 - 00:38:29

This window, which counts precisely these non-vaccinated individuals, introduces a systematic bias.

00:38:30 - 00:38:33

Third indication render obbligatori i dibattiti pubblici

00:38:33 - 00:38:37

contraddittori su arguments scientifically controversial, involving Scienziati

00:38:37 - 00:38:40

privi di conflitti di interesse e che

00:38:40 - 00:38:44

se impegnino in anticipo ad accettare le

00:38:44 - 00:38:46

prove più solide che emergeranno.

00:38:47 - 00:38:50

Instead, ensure that the set of

00:38:50 - 00:38:53

data of public use anonymized are

00:38:53 - 00:38:56

available for analysis. part of independent

00:38:56 - 00:38:59

researchers, in order to provide a

00:38:59 - 00:39:03

balanced perspective on the answer to

00:39:03 - 00:39:03

19.

00:39:04 - 00:39:07

Honourable senators, the Italian people

00:39:07 - 00:39:10

deserve politics based on transparent

00:39:10 - 00:39:13

data. and impartial, non sulla

00:39:13 - 00:39:15

paura, sui modelli or sull'inerzia

00:39:15 - 00:39:16

istituzionale.

00:39:16 - 00:39:19

The data on mortality

00:39:19 - 00:39:21

in excess of both

00:39:21 - 00:39:24

lockdown and vaccination campaigns

00:39:24 - 00:39:26

requires a comprehensive, uncompromising

00:39:26 - 00:39:27

account.

00:39:27 - 00:39:30

Only by openly facing these failures

00:39:30 - 00:39:33

can we restore public trust, protect

00:39:33 - 00:39:36

and safeguard our rights. To ensure

00:39:36 - 00:39:39

that future health emergencies are addressed

00:39:39 - 00:39:42

with humility, science and humanity.

00:39:43 - 00:39:44

I am here.

00:39:44 - 00:39:47

I am ready to answer all your questions

00:39:47 - 00:39:50

and also provide a complete list of bank

00:39:50 - 00:39:54

data studies. data and reference parliamentary documents,  
including

00:39:54 - 00:39:56

the preprint that I have quoted earlier.

00:39:56 - 00:39:59

I would also like to have permission to

00:39:59 - 00:40:03

deliver other documents in the coming days by

00:40:03 - 00:40:06

responding. If necessary, questions that will be asked

00:40:06 - 00:40:09

during this session or if further requests are

00:40:09 - 00:40:09

made.

00:40:09 - 00:40:10

Thanks for the attention.

00:40:22 - 00:40:25

Ok, thank you again for the synthesis.

00:40:25 - 00:40:27

So I should start asking the majority.

00:40:30 - 00:40:31

Ehm.

00:40:32 - 00:40:35

On the order of work because President,

00:40:35 - 00:40:39

I could not attend this audition in

00:40:39 - 00:40:42

all a first part. I received the

00:40:42 - 00:40:45

notice after the Commission was convened, i

00:40:45 - 00:40:48

have received the notice at 18:41.

00:40:48 - 00:40:51

I had to insert who to come.

00:40:51 - 00:40:54

Thus, who does not know and rudiments of the right

00:40:54 - 00:40:58

do not know that a notice of convocation is an

00:40:58 - 00:41:01

act. unilateral recettizio, which produces effects at the moment  
in

00:41:01 - 00:41:04

which it comes to the knowledge of the recipient.

00:41:04 - 00:41:08

President, if the law and offices intend to make

00:41:08 - 00:41:11

difficult my participation in this Commission, as I have

00:41:11 - 00:41:14

already seen in more than one occasion, I declare

00:41:14 - 00:41:17

it. openly, but today I have not been able

00:41:17 - 00:41:21

to arrive in time to listen to this audition,

00:41:21 - 00:41:24

because The notice of convocation has been recapitulated  
successively

00:41:24 - 00:41:27

at the beginning of this audition and this is

00:41:27 - 00:41:28

very serious.

00:41:30 - 00:41:31

Well, la thank you.

00:41:32 - 00:41:35

I was premunito di sentire of course

00:41:35 - 00:41:38

there is no will to incur a

00:41:38 - 00:41:41

prejudice because it has been present at

00:41:41 - 00:41:45

all times. We have waited and awaited

00:41:45 - 00:41:48

and signed the sign, who wants to

00:41:48 - 00:41:51

be beautiful, sa benissimo, sa benissimo, sa

00:41:51 - 00:41:54

benissimo. Oppositions, I always call it first,

00:41:54 - 00:41:58

sometimes also as an act of courtesy

00:41:58 - 00:42:01

despite so not no I believe that

00:42:01 - 00:42:04

you can be accused of not wanting

00:42:04 - 00:42:07

the opposition to participate, but at most

00:42:07 - 00:42:08

the opposite.

00:42:09 - 00:42:12

And then I asked the offices if the

00:42:12 - 00:42:15

message had been inviato, and the offices told

00:42:15 - 00:42:19

me that it had already been inviato. Messaggio

00:42:19 - 00:42:22

ho sentito non lo so however io ho

00:42:22 - 00:42:25

chiesto qui di un avviso di convocazione come

00:42:25 - 00:42:28

ho already said and this is very serious.

00:42:28 - 00:42:31

Deputy Colucci io ho fatto la mia

00:42:31 - 00:42:34

parte non è un dibattito, i.e. I

00:42:34 - 00:42:37

understand His irritation, but if it was

00:42:37 - 00:42:39

the maximum, it was a disguise.

00:42:39 - 00:42:44

There was no intention of preventing him from participating.

00:42:44 - 00:42:48

Well, but when it comes to very heavy things,

00:42:48 - 00:42:51

we must say then how much, and then how

00:42:51 - 00:42:55

much we estimate, but I don't know much.

00:42:59 - 00:43:02

Dalla Commissione l'avevo già segnalato

00:43:02 - 00:43:05

diverse volte dicendo a volte

00:43:05 - 00:43:07

il messaggio due giorni As

00:43:07 - 00:43:10

a result, we are accusing

00:43:10 - 00:43:13

the Commission workers of very

00:43:13 - 00:43:14

serious matters.

00:43:14 - 00:43:17

I present that the message has been

00:43:17 - 00:43:20

inviato first at 17:44 the first message

00:43:20 - 00:43:24

and then is arrivato a message at

00:43:24 - 00:43:27

18:45 from the Commission first at 17.

00:43:27 - 00:43:30

I am sorry but I must correct it the message

00:43:30 - 00:43:33

to me arrived at 17:26 so first compared with all

00:43:33 - 00:43:36

the time that you said to me. Excuse me President

00:43:36 - 00:43:39

if I have to correct it, but it is for

00:43:39 - 00:43:42

the protection of Commission workers that I receive the SMS

00:43:42 - 00:43:43

message.

00:43:43 - 00:43:46

Della Commissione è arrivato alle 17:26 ai colleghi alle 17:44

00:43:46 - 00:43:50

eh ma guardate io che pongo il problema a I

00:43:50 - 00:43:53

am arriving at 18:41 so that I will abbiate it

00:43:53 - 00:43:57

received first the topic that to me arrived at 18.

00:43:57 - 00:44:00

Change the operator by phone recettizio ma che

00:44:00 - 00:44:04

atto recettizio un essere deputato deputato Colucci deputato

00:44:04 - 00:44:07

Colucci la mia pazienza ha un limite con

00:44:07 - 00:44:11

I understand that there may have been a

00:44:11 - 00:44:14

problem with receipt on your part, I understand

00:44:14 - 00:44:18

it, the sms was inviato, the SMS was

00:44:18 - 00:44:21

inviato at 1 hour. not accuse the offices

00:44:21 - 00:44:24

and workers of the offices of inefficiency this

00:44:24 - 00:44:28

non glielo consento questo non glielo consento perché

00:44:28 - 00:44:31

i lavoratori sono i lavoratori Lei non parli

00:44:31 - 00:44:35

sotto di me i lavoratori sono lavoratori del

00:44:35 - 00:44:38

Senato are at the disposal of the Chamber

00:44:38 - 00:44:42

and the Senate are at the disposal of

00:44:42 - 00:44:42

all.

00:44:42 - 00:44:47

You are offending honesty and the work of those who work for offices.

00:44:47 - 00:44:49

It may have been a disguise.

00:44:49 - 00:44:52

You can tell me the message I have received, not my

00:44:52 - 00:44:55

talking below, not my speaking below, not my speaking below.

00:44:55 - 00:45:02

Lei is a wicked, lei is a wicked, lei is a wicked, lei is a wicked.

00:45:02 - 00:45:06

Lei continues to speak below, lei continues to talk below.

00:45:07 - 00:45:11

He is a disgraceful man, we know him now, they also know him internationally.

00:45:11 - 00:45:14

The law should not speak while

00:45:14 - 00:45:17

I spoke, listen to it when

00:45:17 - 00:45:19

you hear it when you talk

00:45:19 - 00:45:22

if you must apologize for it.

00:45:22 - 00:45:25

If you have to apologize for the disappointment of

00:45:25 - 00:45:28

my excuses, forgive me forgiveness or stop interrupting and

00:45:28 - 00:45:32

working. Do it badly and speak on the President's

00:45:32 - 00:45:35

voice if you don't leave the House so we

00:45:35 - 00:45:38

solve the problem and solve the problem for everyone.

00:45:38 - 00:45:42

I express my solidarity with the Commission workers

00:45:42 - 00:45:45

who have been unjustly accused. by deputy Colucci

00:45:45 - 00:45:48

of an efficiency that is not there.

00:45:49 - 00:45:52

If it was a disguise, because

00:45:52 - 00:45:55

to deputy Colucci the message, unlike

00:45:55 - 00:45:57

all other commissioners, arrived later.

00:45:57 - 00:45:59

Ma non è colpa dei lavoratori della Commissione che

00:45:59 - 00:46:03

qua tutelo e continuerò sempre a tutelare perché i

00:46:03 - 00:46:06

messaggi vengono inviati a A timetable and thus putting

00:46:06 - 00:46:09

in question the word of workers and what they

00:46:09 - 00:46:11

do, as if there was a conspiracy or its

00:46:11 - 00:46:12

confrontations.

00:46:12 - 00:46:15

It does not matter what the law receives, it enters when it

00:46:15 - 00:46:19

is inviaded so you think if you think that the law.

00:46:21 - 00:46:24

But it is an incredible maleducation,

00:46:24 - 00:46:27

if shameful, if shameful. The censorship

00:46:27 - 00:46:30

is uneducated, offends offices and offends

00:46:30 - 00:46:30

workers.

00:46:30 - 00:46:34

If you are ashamed, please speak to the majority and ask your questions.

00:46:36 - 00:46:36

No not.

00:46:41 - 00:46:47

I apologize for the audits that had nothing to do with these clothes.

00:46:49 - 00:46:57

No, Mr. President, the issue is not Colucci's attack on workers and I regret it.

00:46:57 - 00:47:07

I have absolutely not heard a word of attack on the Commission's workers from Mr. Colucci.

00:47:08 - 00:47:15

It is obvious that one receives for a disguise, for an error can happen, it would fail.

00:47:16 - 00:47:19

Very late communication.

00:47:19 - 00:47:25

He cannot be present in time to listen to the entire audition.

00:47:25 - 00:47:29

It would be enough that the law

00:47:29 - 00:47:32

answered, apologizing for the eventuality of a

00:47:32 - 00:47:35

disguise, and then apologizing to the law.

00:47:35 - 00:47:39

As president, in the event of a

00:47:39 - 00:47:42

disguise, of an error that may have

00:47:42 - 00:47:45

been made, he has mounted everything by

00:47:45 - 00:47:46

law alone.

00:47:46 - 00:47:47

The controversy.

00:47:47 - 00:47:49

This is not acceptable.

00:47:49 - 00:47:54

No, President, I am sorry, but I find myself forced to intervene.

00:47:54 - 00:47:56

Colleague eh, maybe he didn't listen

00:47:56 - 00:47:59

to everything colleague Colucci said, but

00:47:59 - 00:48:02

Colucci's colleague said he has expressed

00:48:02 - 00:48:05

his regret over the President and

00:48:05 - 00:48:05

offices.

00:48:05 - 00:48:08

He has made it clear that if the President

00:48:08 - 00:48:11

and offices were in some way saying they would

00:48:11 - 00:48:15

hinder the participation of colleagues, Colucci has quoted them.

00:48:15 - 00:48:18

But I repeat again we call a tecnicismo di

00:48:18 - 00:48:21

invio fate la ricerca di anche se si sorride

00:48:21 - 00:48:24

sottovoce fate. The research has now been in viat because

00:48:24 - 00:48:27

I have received it at the 18th of 26th,

00:48:27 - 00:48:31

and I don't think I can say it in

00:48:31 - 00:48:31

some way.

00:48:31 - 00:48:34

Yes, the message is coming.

00:48:34 - 00:48:37

Eh guarda, io oggi ho ricevuto 1

00:48:37 - 00:48:40

ora dopo il messaggio l'sms dei taxi

00:48:40 - 00:48:43

rispetto a quando ho preso el taxi.

00:48:43 - 00:48:47

Therefore, they are technical issues we say in line maybe

00:48:47 - 00:48:50

I will be concerned with which operator you use inside

00:48:50 - 00:48:53

the palace because maybe we don't take SMS. You received

00:48:53 - 00:48:57

it because you sent it to me at 17:26 and

00:48:57 - 00:49:00

then at 18:45 so ask a question and give an

00:49:00 - 00:49:01

answer.

00:49:01 - 00:49:06

But accusing the offices and the president seems to me a really serious thing.

00:49:06 - 00:49:12

If I consent, I will proceed with a single question that I personally ask.

00:49:12 - 00:49:15

Mezz'ora mezz'ora eh, Su la question

00:49:15 - 00:49:19

del lockdown ehm avete in modo

00:49:19 - 00:49:22

molto chiara usato anche parole eh

00:49:22 - 00:49:25

forti cioè su quanto il Lockdown

00:49:25 - 00:49:28

can have profoundly damaged lives in

00:49:28 - 00:49:32

terms of economy and also harm

00:49:32 - 00:49:35

to the psychophysical growth of minors.

00:49:35 - 00:49:38

So I would like to refer

00:49:38 - 00:49:42

you to a very scientific question,

00:49:42 - 00:49:45

i.e., the type of study that

00:49:45 - 00:49:48

will be used to come up

00:49:48 - 00:49:50

with these affirmations.

00:49:50 - 00:49:53

And if it is from the graph that

00:49:53 - 00:49:56

has made us see extremely clearly, then you

00:49:56 - 00:49:59

can put this Commission at your disposal and

00:49:59 - 00:50:03

more studies are possible. The Lockdown question that

00:50:03 - 00:50:06

is a topic for me personally stands close

00:50:06 - 00:50:09

to my heart and I totally agree with

00:50:09 - 00:50:10

your affirmations.

00:50:13 - 00:50:14

Thank you very much!

00:50:15 - 00:50:18

Thank you very much for the question clearly

00:50:18 - 00:50:21

certain I will give to the commission all

00:50:21 - 00:50:25

references eh, everything that is in my possession.

00:50:25 - 00:50:28

Regarding the lockdown I think it is very

00:50:28 - 00:50:31

interesting and all the conclusions to which they

00:50:31 - 00:50:35

are joined. These researches to which these colleagues

00:50:35 - 00:50:38

have joined must be analyzed in a scientific

00:50:38 - 00:50:38

way.

00:50:39 - 00:50:42

The lockdown is something that has not had a

00:50:42 - 00:50:44

precedent in no epidemic prior to the pandemic since

00:50:44 - 00:50:47

19 the lockdown was not. For people who are

00:50:47 - 00:50:50

healthy, they were stated messi in atto for persons

00:50:50 - 00:50:53

who are sick but for persons who are healthy

00:50:53 - 00:50:53

no.

00:50:53 - 00:50:58

Individual freedom has been sacrificed and this has been demonstrated in many studies.

00:50:58 - 00:51:02

I would like to seize the opportunity for more possible studies.

00:51:02 - 00:51:03

Anzi la thank you.

00:51:03 - 00:51:07

I will give these studies and make them available to

00:51:07 - 00:51:10

the Commission as soon as possible, but I would like

00:51:10 - 00:51:13

to repeat once again that this has been something unprecedented

00:51:13 - 00:51:16

and unprecedented. and the mortality was much higher so more

00:51:16 - 00:51:20

stringent are stated Lockdown more old are state the dead

00:51:20 - 00:51:23

the number of This is based on scientific indications, so

00:51:23 - 00:51:26

the more lockdown has been done, the more dead it

00:51:26 - 00:51:27

has been done.

00:51:27 - 00:51:30

The proof of this is very

00:51:30 - 00:51:33

clear and I will provide it

00:51:33 - 00:51:36

directly in the report that you

00:51:36 - 00:51:39

have spoken about 500 pages from

00:51:39 - 00:51:42

the Commission. d'inchiesta sul virus in

00:51:42 - 00:51:45

America has done on the question

00:51:45 - 00:51:48

Lockdown in these 500 pages si

00:51:48 - 00:51:52

ritrova del material importante avete dato

00:51:52 - 00:51:52

spazio.

00:51:54 - 00:51:58

Yes, yes it is not widely spoken I

00:51:58 - 00:52:01

believe that in the entire page of my

00:52:01 - 00:52:04

material you can see they have spoken of

00:52:04 - 00:52:07

various dimensions. and we also reference all pages

00:52:07 - 00:52:10

relative to the report so it is quite

00:52:10 - 00:52:13

simple to find this report, we will pass

00:52:13 - 00:52:15

on the link for download.

00:52:16 - 00:52:19

E parla della salute mentale e degli effetti sull'economia

00:52:19 - 00:52:22

parla dello sviluppo dei bambini parla della salute fisica

00:52:22 - 00:52:25

There are also those that have been called in

00:52:25 - 00:52:27

Italy Green Pass in Europe and Green Pass.

00:52:28 - 00:52:31

My colleague, Dr. Hooker said that it is something unprecedented

00:52:31 - 00:52:35

and returns a moment to him exactly as well. The

00:52:35 - 00:52:39

approach has always been to protect the most vulnerable people

00:52:39 - 00:52:41

and allow all others to continue their lives.

00:52:41 - 00:52:43

This is a bit of the essence.

00:52:43 - 00:52:46

The centre of the Great Barrington Declaration, which

00:52:46 - 00:52:50

has had more than 1 million firms worldwide

00:52:50 - 00:52:53

and The two key signatories of this are

00:52:53 - 00:52:56

Dr. Valditara Valditara and Dr. Marco Outdoor.

00:52:57 - 00:53:02

They are in high positions in the administration of health services.

00:53:03 - 00:53:04

What does Italy have?

00:53:04 - 00:53:10

Well, I think he can answer all his concerns.

00:53:10 - 00:53:13

Martin in this moment is a counselor to

00:53:13 - 00:53:17

Secretary Kennedy Their approach all within the Great

00:53:17 - 00:53:21

Barrington Declaration is the classical approach of the

00:53:21 - 00:53:24

United Nations. Public health policy Standard, i.e. not

00:53:24 - 00:53:28

if they do the lockdown in your whole

00:53:28 - 00:53:31

country The World Health Organization had previously expressed

00:53:31 - 00:53:34

its opinion against the general lockdown.

00:53:37 - 00:53:40

Senator Lucio Malan.

00:53:40 - 00:53:41

Please please.

00:53:41 - 00:53:44

Thank you President Italian because

00:53:44 - 00:53:47

we are in ehm then

00:53:47 - 00:53:50

I would like to ask

00:53:50 - 00:53:53

Dr. Hooker for an explanation

00:53:53 - 00:53:56

on this matter. This diagram

00:53:56 - 00:53:59

shows what is the unit

00:53:59 - 00:54:02

of measurement for both countries.

00:54:05 - 00:54:06

by two parameters.

00:54:10 - 00:54:15

Because this is an extremely important scheme, but it should be understood.

00:54:18 - 00:54:19

Thank you so much for that.

00:54:21 - 00:54:22

Thank you very much for the question.

00:54:25 - 00:54:29

The axis of y is the answer and the independent variable.

00:54:32 - 00:54:37

This is the number of deaths per 100,000 people.

00:54:37 - 00:54:39

The population of 100,000 in these

00:54:39 - 00:54:42

countries, therefore substantially is a representation

00:54:42 - 00:54:45

of the number of dead every

00:54:45 - 00:54:47

100,000 individuals in each of those

00:54:47 - 00:54:48

countries.

00:54:50 - 00:54:53

Instead of the variable  $x$

00:54:53 - 00:54:56

the axis  $X$ , then horizontal

00:54:56 - 00:54:59

by intenderci, this is also

00:54:59 - 00:55:02

An independent variable is the

00:55:02 - 00:55:06

percentage of people vaccinated with

00:55:06 - 00:55:07

a vaccine.

00:55:07 - 00:55:18

So on the basis if they had made 2 or 3 vaccine calls by January 22, then this was the case.

00:55:21 - 00:55:24

Risposta al centro della pandemia quindi il primo

00:55:24 - 00:55:28

anno durante la campagna di vaccinazione so Pfizer

00:55:28 - 00:55:31

eh what is it? This was 13 months

00:55:31 - 00:55:34

after the start of the vaccine campaign.

00:55:35 - 00:55:38

As you can see, every country is

00:55:38 - 00:55:41

represented by who on the basis of

00:55:41 - 00:55:45

the number of deaths that have had

00:55:45 - 00:55:48

every 100,000 people or the quantity the

00:55:48 - 00:55:51

percentage of people compared to the percentage

00:55:51 - 00:55:55

of people. who were vaccinated that have

00:55:55 - 00:55:58

a complete vaccine against it 19 by

00:55:58 - 00:56:01

20 January 22 the curve goes therefore

00:56:01 - 00:56:05

in other words higher the rate of

00:56:05 - 00:56:08

vaccination More people were vaccinated in each

00:56:08 - 00:56:11

of these countries, more high the general

00:56:11 - 00:56:13

mortality, higher the increase.

00:56:13 - 00:56:16

Anzi immortality in what period of time

00:56:16 - 00:56:19

would be useful if it does not

00:56:19 - 00:56:22

have the same table. Col logaritmo ma

00:56:22 - 00:56:25

col numero col numero normale because, as

00:56:25 - 00:56:28

to say, we do not have this

00:56:28 - 00:56:28

dimestichezza.

00:56:28 - 00:56:32

Per with logarithms this happens.

00:56:34 - 00:56:35

Thank you so much for.

00:56:37 - 00:56:38

1000 thanks for the comment.

00:56:40 - 00:56:40

Certainly.

00:56:40 - 00:56:46

Then I will also give you the data in another, eh, not your logarithmic scale as in this case.

00:56:46 - 00:56:53

Oh sorry, I'm a bit of a nerd, if we want to be scientific, one scientist.

00:56:53 - 00:56:59

Thank you for this comment, I will give this information in a more clear way eh, Vorrei fraedere eh.

00:56:59 - 00:57:03

On the following scheme, which

00:57:03 - 00:57:06

is that of the paradox

00:57:06 - 00:57:10

oh, growth of mortality, eh,

00:57:10 - 00:57:12

these are absolute numbers.

00:57:14 - 00:57:15

I think.

00:57:16 - 00:57:17

and la.

00:57:19 - 00:57:22

If it refers to the beginning, then

00:57:22 - 00:57:26

that of the beginning of the segment

00:57:26 - 00:57:29

in red begins with The moment of

00:57:29 - 00:57:32

the vaccination that really changes has been

00:57:32 - 00:57:35

a state I think right.

00:57:35 - 00:57:38

And then I would like to ask you

00:57:38 - 00:57:42

for a comment on this of the difference

00:57:42 - 00:57:45

between the dead very much. Major after the

00:57:45 - 00:57:48

start of vaccination than before if you want

00:57:48 - 00:57:51

to leave some comments on this.

00:57:54 - 00:57:57

Certainly these are absolute numbers, this

00:57:57 - 00:58:00

is not their logarithmic scale. In

00:58:00 - 00:58:03

the previous this is an absolute

00:58:03 - 00:58:06

table who guardiamo le morti cumulative.

00:58:06 - 00:58:09

Since when it vaccine is made available in these

00:58:09 - 00:58:12

continents in these regions in particular that you see

00:58:12 - 00:58:15

who in the blue what are the part blue.

00:58:15 - 00:58:18

The blue bar and the red bar are

00:58:18 - 00:58:22

the dead during the vaccination phase, therefore during

00:58:22 - 00:58:25

the vaccine campaign in December. By mid-December 2020,

00:58:25 - 00:58:29

some Alconi countries have initiated the vaccine campaign

00:58:29 - 00:58:31

later and are therefore aggregate numbers.

00:58:32 - 00:58:35

There are many countries in Africa and many of

00:58:35 - 00:58:38

these have initiated the vaccination campaign at different times.

00:58:39 - 00:58:43

Well, if you have all this in mind.

00:58:43 - 00:58:47

Therefore, during the vaccine campaign, in the period

00:58:47 - 00:58:50

of vaccinations, we see that there are deaths

00:58:50 - 00:58:54

in many of these regions. Even in Europe,

00:58:54 - 00:58:58

especially in Europe, I would say they are

00:58:58 - 00:59:01

the oldest states during the vaccine campaign and

00:59:01 - 00:59:03

these have died since 19.

00:59:03 - 00:59:09

Thus, in the death certificate, the cause of death was linked to 19.

00:59:09 - 00:59:16

Thus, these are not general mortality or mortality with any kind of cause in these regions.

00:59:17 - 00:59:22

These are dead connected to 19.

00:59:23 - 00:59:26

Thank you for asking all

00:59:26 - 00:59:30

the lawyers of Holland ECM

00:59:30 - 00:59:33

on a proposito della verosimile

00:59:33 - 00:59:37

natura di laboratorio del eh

00:59:37 - 00:59:40

del The virus says that

00:59:40 - 00:59:44

the laboratory in Wuhan has

00:59:44 - 00:59:47

a past of research game

00:59:47 - 00:59:51

of function and it is

00:59:51 - 00:59:54

known to know which.

00:59:54 - 00:59:57

If you can explain to me what is

00:59:57 - 01:00:01

the purpose of research Game of Function and

01:00:01 - 01:00:04

whether these research games of function are still

01:00:04 - 01:00:07

conducted now in general in the world.

01:00:13 - 01:00:18

Yes, so this game of function guadagno di funzione in Italian.

01:00:18 - 01:00:21

The aim of this research is to

01:00:21 - 01:00:24

increase the pathogenicity of a virus, in

01:00:24 - 01:00:26

particular a bacterium or other types.

01:00:26 - 01:00:29

It is an entity.

01:00:29 - 01:00:34

So make it more transmissible, more infectious or something else, or both.

01:00:34 - 01:00:37

The United States has funded many of

01:00:37 - 01:00:40

these researches Game of Function both in

01:00:40 - 01:00:43

the United States and abroad, and various

01:00:43 - 01:00:45

subsidies. which have been granted by the

01:00:45 - 01:00:48

National Institutes of Health or other institutions

01:00:48 - 01:00:51

are also granted to all'institute to Wuhan

01:00:51 - 01:00:52

laboratory.

01:00:52 - 01:00:56

In the literature published it is seen

01:00:56 - 01:00:59

that he was trying to understand how

01:00:59 - 01:01:01

to make SARS COV more transmissible.

01:01:02 - 01:01:05

And there are also various evidence that

01:01:05 - 01:01:08

I say the safety of which laboratory

01:01:08 - 01:01:10

was not adequate, it wasn't sufficient.

01:01:10 - 01:01:15

And there are several reports to the State Department in the United States that exist.

01:01:15 - 01:01:17

There have been previous stages of laboratory

01:01:17 - 01:01:20

flights, but they are also a part

01:01:20 - 01:01:22

of the research game of function.

01:01:22 - 01:01:26

Yes, in the United States today and also

01:01:26 - 01:01:29

elsewhere in the world we have not spoken

01:01:29 - 01:01:33

with Italy too. Treatment in particular concerning benefits,

01:01:33 - 01:01:36

if I don't remember bad and the access

01:01:36 - 01:01:40

to pathogens and the sharing of benefits if

01:01:40 - 01:01:43

I am not mistaken is this la la

01:01:43 - 01:01:47

la. nomenclature that would expand the research on

01:01:47 - 01:01:50

all functions in the world and therefore in

01:01:50 - 01:01:54

the transportation of these pathogens, maybe a colleague

01:01:54 - 01:01:56

wants to add something.

01:01:56 - 01:01:59

My question would be precisely what is the purpose

01:01:59 - 01:02:02

because how to say common sense seems a madness

01:02:02 - 01:02:05

what is the reason for which these experiments are

01:02:05 - 01:02:08

done. to make the virus more dangerous one would

01:02:08 - 01:02:11

never think of doing the opposite, but it will

01:02:11 - 01:02:14

be a scientific reason I imagine for this.

01:02:18 - 01:02:22

There is always a scientific reason for scientific research.

01:02:22 - 01:02:26

Ehm io as regards the research in

01:02:26 - 01:02:29

particular anzi metterei in guardia gli scienziati

01:02:29 - 01:02:32

ci sono diversi laboratorii In the United

01:02:32 - 01:02:35

States that do this these researches concerning

01:02:35 - 01:02:38

precisely the performance of function.

01:02:38 - 01:02:41

Ehm, if you call it level

01:02:41 - 01:02:44

three there are different laboratories that

01:02:44 - 01:02:47

are not one in particular that

01:02:47 - 01:02:49

over the past twenty years have

01:02:49 - 01:02:52

had 14 different laboratory incidents that

01:02:52 - 01:02:53

have been.

01:02:53 - 01:02:57

The aim therefore is not to anticipate

01:02:57 - 01:03:00

a possible evolution of these pathogenic viruses

01:03:00 - 01:03:04

in general bacteria, so by itself it

01:03:04 - 01:03:07

could be anticipated. The way in which

01:03:07 - 01:03:10

this organism will mutate in the future

01:03:10 - 01:03:14

then if it can prevent and whether

01:03:14 - 01:03:17

it can create a vaccine in particular

01:03:17 - 01:03:21

or an antidote in particular for that.

01:03:21 - 01:03:24

Clearly this is a rather weak

01:03:24 - 01:03:27

base, because the way in which

01:03:27 - 01:03:31

what virus or bacterium pathogen in

01:03:31 - 01:03:34

general if it evolves in cases

01:03:34 - 01:03:37

in a context of vaccination is

01:03:37 - 01:03:39

very unpredictable, extremely unpredictable.

01:03:39 - 01:03:42

Therefore, we guardiam the way in which

01:03:42 - 01:03:46

the virus reacts during a pandemic context

01:03:46 - 01:03:49

as in the case of SARS. It

01:03:49 - 01:03:52

is quite difficult to predict the way

01:03:52 - 01:03:55

in which this pathogen will evolve or

01:03:55 - 01:03:55

mutate.

01:03:55 - 01:03:59

So I assure you that it is a very weak basis

01:03:59 - 01:04:02

to say if you do this research simply to see how

01:04:02 - 01:04:06

the virus will become more transmissible in order to create vaccines.

01:04:06 - 01:04:10

A universal vaccine is a universal antidote to any pathogen.

01:04:10 - 01:04:17

In particular faccio reference ad some eh all'influenza for example aviary and ad others.

01:04:17 - 01:04:25

Here, if I can add ehm il guadagno di funzione, the gain function is an euphemism.

01:04:25 - 01:04:28

To put it simply, the search for biological weapons is

01:04:28 - 01:04:31

something that has been ongoing for more than 100 years.

01:04:31 - 01:04:34

Le consiglio, in fact a book that we have

01:04:34 - 01:04:37

published that if it calls Cover up, then the

01:04:37 - 01:04:40

cover vegan that is written by Robert Kennedy Junior

01:04:40 - 01:04:43

that talks about the history of the world. Research

01:04:43 - 01:04:46

on biological weapons, the way in which vaccines are

01:04:46 - 01:04:49

researched, the search for functional benefits is simply a

01:04:49 - 01:04:49

cover.

01:04:52 - 01:04:54

Deputy Sancito Pray.

01:04:54 - 01:04:55

Yes, thank you President.

01:04:56 - 01:04:59

I have now obtained a certificate that

01:04:59 - 01:05:01

the vaccine did not reduce transmission of

01:05:01 - 01:05:04

the virus because it is Both in

01:05:04 - 01:05:07

all studies and the certifications of producer

01:05:07 - 01:05:10

cases attest this to the question that

01:05:10 - 01:05:10

I'm asking.

01:05:10 - 01:05:14

The vaccine was able to reduce the severity

01:05:14 - 01:05:17

of the pathology, or it was a mitigation.

01:05:17 - 01:05:20

The virus in the course of time to

01:05:20 - 01:05:23

reduce the severity of symptoms of pathology?

01:05:23 - 01:05:25

Do you have studies in that sense?

01:05:28 - 01:05:33

Yes, we have and can also provide lo studio appposito.

01:05:33 - 01:05:34

First of all thank you for the question.

01:05:34 - 01:05:37

The viral evolution of the virus,

01:05:37 - 01:05:40

typically a virus, typically also with

01:05:40 - 01:05:43

the pressure of selection Having a

01:05:43 - 01:05:46

vaccine, for example, will cause a

01:05:46 - 01:05:49

mutation of the virus and therefore

01:05:49 - 01:05:50

increase survival.

01:05:50 - 01:05:54

The level of harm it can do that

01:05:54 - 01:05:57

may cause a human body but will become

01:05:57 - 01:06:01

even more. We have also seen the difference

01:06:01 - 01:06:04

between the Delta Omicron variant and the others.

01:06:05 - 01:06:08

The virus has become less lethal but

01:06:08 - 01:06:11

more transmissible, so I don't believe that

01:06:11 - 01:06:14

the vaccine has diminished the effects of

01:06:14 - 01:06:18

adverse events or even those which are

01:06:18 - 01:06:21

adverse. This, among other things, is one

01:06:21 - 01:06:24

study that was done with the Cleveland

01:06:24 - 01:06:26

Clinic which has demonstrated that.

01:06:26 - 01:06:29

The more vaccines and the more

01:06:29 - 01:06:32

doses of boosters came out, it

01:06:32 - 01:06:36

was more likely to become a

01:06:36 - 01:06:39

SARS infection due to E ci

01:06:39 - 01:06:42

sono stati poi degli Other subsequent

01:06:42 - 01:06:45

studies have demonstrated that the more

01:06:45 - 01:06:48

doses were inoculated, the more ricoveri.

01:06:48 - 01:06:51

It would be interesting to have

01:06:51 - 01:06:54

these studies then at the disposal

01:06:54 - 01:06:55

of the Commission.

01:07:09 - 01:07:09

Yes yes.

01:07:14 - 01:07:18

I would like to speak with President A.

01:07:23 - 01:07:26

Lei ha parlato eh doctor Hooker

01:07:26 - 01:07:29

di una under reporting di 1000

01:07:29 - 01:07:33

volte in regards to myocarditis is

01:07:33 - 01:07:36

a fact that we have also

01:07:36 - 01:07:39

somehow seen confronting different types. Let

01:07:39 - 01:07:43

us say so of surveillance which

01:07:43 - 01:07:46

is that is this from where

01:07:46 - 01:07:49

it derives this data of the

01:07:49 - 01:07:53

difference of 1000 times and between

01:07:53 - 01:07:56

what between which types of surveillance.

01:07:58 - 01:08:01

The system of surveillance is that

01:08:01 - 01:08:05

of the European Medicines Agency and

01:08:05 - 01:08:08

therefore refers to the incidence of

01:08:08 - 01:08:11

pericarditis and myocarditis. su base volontaria

01:08:11 - 01:08:14

la registrazione then this messo a

01:08:14 - 01:08:17

confronto con l'incidenza negli studi di

01:08:17 - 01:08:20

controllo con controllati so also questi

01:08:20 - 01:08:23

studi io ve li posso fornire

01:08:23 - 01:08:26

когда There is one controlled studio

01:08:26 - 01:08:30

that monitors a champion or group

01:08:30 - 01:08:33

of individuals and if it keeps.

01:08:33 - 01:08:36

Al tasso di miocardite e pericardite

01:08:36 - 01:08:39

di questi individui all'interno del studio

01:08:39 - 01:08:41

controllato se sa che.

01:08:41 - 01:08:44

Well, if there is an estimate quite close to the

01:08:44 - 01:08:47

number of diagnoses When these studies are measured as a

01:08:47 - 01:08:51

confrontation, it is precisely there that There is this difference

01:08:51 - 01:08:54

of 1000 times in myocarditis that does not come, and

01:08:54 - 01:08:57

the cases of pericardial myocarditis that are not registered.

01:08:59 - 01:09:02

Then yet Dr. Hooker lei parla

01:09:02 - 01:09:05

dei cicli di amplificazione eh nella

01:09:05 - 01:09:08

PCR i cicli Threshold two for

01:09:08 - 01:09:11

the two Cycles EDM e ci

01:09:11 - 01:09:14

dice que sono unreliable above a

01:09:14 - 01:09:17

certain number of cycles and in

01:09:17 - 01:09:20

what way if they are there

01:09:20 - 01:09:24

are standards. definiti sul numero massimo

01:09:24 - 01:09:27

di cicli di amplificazione eh che

01:09:27 - 01:09:30

fino al quale i test sono

01:09:30 - 01:09:30

affidabili.

01:09:33 - 01:09:43

First of all, these PCRs in real time are not a method for diagnosing a disease.

01:09:43 - 01:09:46

The inventor of PCR, Dr. Karim, first disappeared

01:09:46 - 01:09:50

in 2019, has said directly that this is

01:09:50 - 01:09:53

not a diagnostic method and that it is

01:09:53 - 01:09:57

a method. The most appropriate diagnosis would be

01:09:57 - 01:10:00

that which is called test per test antigenico,

01:10:00 - 01:10:04

which would be in grado appunto di Test

01:10:04 - 01:10:07

the nuclear proteins, which are those that in

01:10:07 - 01:10:10

coprono the virus and the protein spike.

01:10:11 - 01:10:13

So if it can have a

01:10:13 - 01:10:16

direct measure of these entities and

01:10:16 - 01:10:19

this clearly connects directly to the

01:10:19 - 01:10:21

presence of the virus in a

01:10:21 - 01:10:22

body.

01:10:22 - 01:10:26

PCR, especially when done

01:10:26 - 01:10:29

over 30 cycles, is

01:10:29 - 01:10:32

extremely unreliable. Tasso di

01:10:32 - 01:10:35

affidabilità si abbassa molto

01:10:35 - 01:10:38

tra i venti, especially

01:10:38 - 01:10:40  
between I20EI28 cycles.

01:10:40 - 01:10:43  
So if you could test the presence of

01:10:43 - 01:10:47  
a fraction of SARS due to a countdown.

01:10:47 - 01:10:50  
Minor of cycles, but at the moment in

01:10:50 - 01:10:53  
which it exceeds and is over 35 cycles.

01:10:53 - 01:10:55  
To what extent are they gods?

01:10:55 - 01:10:58  
If you see small, small amounts

01:10:58 - 01:11:02  
of RNA that may have similarities

01:11:02 - 01:11:05  
or can, for example, directly bundle

01:11:05 - 01:11:08  
what they call primary. PCR and

01:11:08 - 01:11:11  
this we are certi but ecco

01:11:11 - 01:11:14  
sono dei frammenti molto molto labili

01:11:14 - 01:11:17  
di eh other viruses for example

01:11:17 - 01:11:21

eh virus that are not necessarily

01:11:21 - 01:11:22

SARS due.

01:11:25 - 01:11:29

Wait until we verify yes, there are 8 minutes left.

01:11:33 - 01:11:36

Another question about censorship and this

01:11:36 - 01:11:40

I ask the doctor Roland, lawyer

01:11:40 - 01:11:43

Roland ECM where there is an

01:11:43 - 01:11:47

explanation. In some cases, there are

01:11:47 - 01:11:50

legal causes that have been investigated

01:11:50 - 01:11:54

because, for example, Kennedy's case against

01:11:54 - 01:11:57

President Biden was closed in 2026.

01:11:57 - 01:12:04

What was what was the outcome, because in its exhibition it may not have been clear to me.

01:12:07 - 01:12:11

So yes, the outcome of just this

01:12:11 - 01:12:14

cause Kennedy vs. Biden that became then

01:12:14 - 01:12:17

Children's Health Defense against Trump was a

01:12:17 - 01:12:21

settlement so an agreement was a result

01:12:21 - 01:12:24

The current administration has acknowledged that the

01:12:24 - 01:12:28

previous administration had even perpetrated a direct

01:12:28 - 01:12:31

copyright saying all platforms of networking. social

01:12:31 - 01:12:35

copyright information of groups such as for

01:12:35 - 01:12:38

example the Children's Health Defense eh violando

01:12:38 - 01:12:42

il primo emendamento è stata pagata somma

01:12:42 - 01:12:45

hanno pagato le spese They legalized and

01:12:45 - 01:12:48

acknowledged precisely that all this has happened

01:12:48 - 01:12:52

to us, we have not received a

01:12:52 - 01:12:55

decree of consensus which instead refers to

01:12:55 - 01:12:59

the major cause. Missouri vs. Biden where

01:12:59 - 01:13:02

the 212 Stati measure Louisiana eh they

01:13:02 - 01:13:06

had then made this agreement and in

01:13:06 - 01:13:09

what case the Government had to produce

01:13:09 - 01:13:13

documents Include the appropriate e-mail that you

01:13:13 - 01:13:16

have seen in slides clearing that government

01:13:16 - 01:13:20

officials violating the Constitution. And the laws

01:13:20 - 01:13:23

had told all social platforms and social

01:13:23 - 01:13:26

networks to censor some information, including truthful

01:13:26 - 01:13:27

information.

01:13:28 - 01:13:30

And this decision was then made by a

01:13:30 - 01:13:33

federal judge who has said that this was

01:13:33 - 01:13:36

the case of There is more censorship than

01:13:36 - 01:13:39

it has ever been seen in the history

01:13:39 - 01:13:42

of the United States and a judge has

01:13:42 - 01:13:43

said so.

01:13:43 - 01:13:46

Therefore, a judge who has said to the

01:13:46 - 01:13:50

public and also to the social that this

01:13:50 - 01:13:53

event was happening and precisely the Government in

01:13:53 - 01:13:56

which case it was. The government itself said

01:13:56 - 01:13:59

that you should censor this information so it

01:13:59 - 01:14:02

was a huge episode of censorship.

01:14:02 - 01:14:06

There have been other cases of political censorship in which we have not participated.

01:14:06 - 01:14:11

There has also been censorship regarding information about elections.

01:14:11 - 01:14:14

But here, we are clearly focused on the

01:14:14 - 01:14:18

censorship of the web, which has been very

01:14:18 - 01:14:21

widespread and I would also like to mention,

01:14:21 - 01:14:24

among other things, the censorship of doctors. Doctors

01:14:24 - 01:14:27

who could not speak directly to their patients

01:14:27 - 01:14:31

and doctors who couldn't even talk publicly about

01:14:31 - 01:14:34

some things that are state facts. For example,

01:14:34 - 01:14:37

what medicines they could take, which methods they

01:14:37 - 01:14:39

could use to prevent co-operation.

01:14:40 - 01:14:42

And the vaccines, too.

01:14:42 - 01:14:47

In short, this type of censorship has also been done if I  
colleagues do not have others.

01:14:47 - 01:14:47

Ehm.

01:14:49 - 01:14:55

As far as censorship of news is concerned, has law brought some  
examples?

01:14:55 - 01:14:59

I am interested in the issue of children's vaccines.

01:14:59 - 01:15:02

What is the aspect of

01:15:02 - 01:15:05

censorship and what was the

01:15:05 - 01:15:08

aspect of effectiveness or balance

01:15:08 - 01:15:10

between risks and benefits?

01:15:11 - 01:15:14

In the vaccine of children or also of

01:15:14 - 01:15:17

minors not necessary under and twelve years If

01:15:17 - 01:15:20

you are under 18 years old, I will

01:15:20 - 01:15:23

be happy to listen to your assessments of

01:15:23 - 01:15:23

merit.

01:15:28 - 01:15:31

Yes, the censorship initially in the initial phase

01:15:31 - 01:15:35

of Covip so we will talk about the

01:15:35 - 01:15:38

lockdown between 2020 and 2021 not if it

01:15:38 - 01:15:42

is mainly focused on vaccination. We can say

01:15:42 - 01:15:45

very clearly that there has been an active

01:15:45 - 01:15:48

suppression of adverse events neither for children nor

01:15:48 - 01:15:51

young people, especially with regard to myocarditis.

01:15:51 - 01:15:55

My colleague can confirm that there has

01:15:55 - 01:15:58

been a censorship of the adverse events

01:15:58 - 01:16:01

on young people. To normalize myocarditis as

01:16:01 - 01:16:04

an effect of the vaccine, therefore like

01:16:04 - 01:16:07

if it were one is like if

01:16:07 - 01:16:10

it was a normal disease for children.

01:16:11 - 01:16:14

At the moment in which scientists

01:16:14 - 01:16:16

have sought to publish the incidence

01:16:16 - 01:16:19

of myocarditis, neither children, especially children

01:16:19 - 01:16:22

nor males have been one.

01:16:22 - 01:16:26

There are states of difficulties in communicating

01:16:26 - 01:16:29

information, especially when there is a real

01:16:29 - 01:16:32

incidence. Any type of damage to myocardium

01:16:32 - 01:16:36

that is the muscle of the heart.

01:16:36 - 01:16:39

The incidence of any damage

01:16:39 - 01:16:42

to the myocardium in that

01:16:42 - 01:16:45  
population has been a censorship

01:16:45 - 01:16:48  
even in this case. There

01:16:48 - 01:16:51  
are also documents of reports

01:16:51 - 01:16:53  
that have been published about

01:16:53 - 01:16:56  
newspapers, which are very important

01:16:56 - 01:16:59  
and have an impact on

01:16:59 - 01:17:01  
public opinion.

01:17:03 - 01:17:06  
And many of these newspapers did

01:17:06 - 01:17:10  
not accept publications that contained this

01:17:10 - 01:17:13  
information so the censorship was also

01:17:13 - 01:17:16  
done on the press fundamentally some

01:17:16 - 01:17:19  
studies are not published.

01:17:19 - 01:17:22  
I would also like to add that

01:17:22 - 01:17:25  
we have published a book in it

01:17:25 - 01:17:28  
between 2021 and 2022 and that if

01:17:28 - 01:17:31  
you call It is a book that

01:17:31 - 01:17:34  
concerned proprio i bambini che sono morti.

01:17:34 - 01:17:37  
Plausibly many of these deaths are

01:17:37 - 01:17:39  
state-caused by COVIP and these are

01:17:39 - 01:17:42  
information that is not found on

01:17:42 - 01:17:45  
the press as newspapers and social

01:17:45 - 01:17:45  
etc.

01:17:46 - 01:17:48  
In the book it is said

01:17:48 - 01:17:51  
that these children have been vaccinated

01:17:51 - 01:17:53  
and this information is completely hidden,

01:17:53 - 01:17:54  
suppressed.

01:17:55 - 01:17:58  
Many children are dead and in a

01:17:58 - 01:18:01

way that would have been unexplained before

01:18:01 - 01:18:04

the Covip I will also provide this

01:18:04 - 01:18:04

book.

01:18:07 - 01:18:10

Last question 2 minutes deputy yes, I will be the fastest President.

01:18:12 - 01:18:15

In the moment in which the vaccine is

01:18:15 - 01:18:19

located on the receptor, Spike enters all within

01:18:19 - 01:18:22

the cells and then RNA. The message that

01:18:22 - 01:18:26

was contained all within the vaccine can, according

01:18:26 - 01:18:29

to law, determine the modifications of future changes

01:18:29 - 01:18:32

on the DNA of the cell.

01:18:36 - 01:18:39

On the basis of recent research that

01:18:39 - 01:18:43

is state-fatte from Dr. Kevin McConnell's laboratory,

01:18:43 - 01:18:46

we know that modern vaccines and Pfizer

01:18:46 - 01:18:50

They had a DNA contamination that was

01:18:50 - 01:18:53

homologous to the Spike protein, in other

01:18:53 - 01:18:57

words it was a DNA that has

01:18:57 - 01:18:59

codified the Spike protein.

01:18:59 - 01:19:02

This is something that has

01:19:02 - 01:19:05

been hidden from the FDA

01:19:05 - 01:19:08

and ECM only. A particular

01:19:08 - 01:19:11

type of reaction would allow

01:19:11 - 01:19:14

a person to identify what

01:19:14 - 01:19:15

DNA.

01:19:15 - 01:19:18

The problem is that DNA can integrate all within the

01:19:18 - 01:19:22

genome directly or, if not integrate it all inside the

01:19:22 - 01:19:25

genome. The genome can enter the nucleus and every time

01:19:25 - 01:19:28

that cell divides which DNA will be replicated.

01:19:28 - 01:19:32

So yes, it definitely damages the DNA.

01:19:32 - 01:19:35

There are many implications related to

01:19:35 - 01:19:38

this damage and this can promote

01:19:38 - 01:19:41

also may favor. Even the emergence

01:19:41 - 01:19:44

of some types of cancer, if

01:19:44 - 01:19:47

there are reference studies can provide.

01:19:50 - 01:19:53

Certainly what I have studied in reference

01:19:53 - 01:19:56

to, and the studies of which I

01:19:56 - 01:19:59

am speaking also as regards it. The

01:19:59 - 01:20:01

work of Kevin McConnell, yes, I definitely

01:20:01 - 01:20:04

have other publications that can be useful.

01:20:04 - 01:20:05

I will surely give it.

01:20:05 - 01:20:08

Thank you Senator, please.

01:20:09 - 01:20:12

Yes, I read on Wikipedia that your association

01:20:12 - 01:20:14

is considered the largest or in any case

01:20:14 - 01:20:17

the most funded association in the world.

01:20:17 - 01:20:18

Don't wax like that.

01:20:22 - 01:20:25

But it is not true, it is not so.

01:20:25 - 01:20:31

We are not an association no vax, we are pro science.

01:20:31 - 01:20:36

As for issues of public health, Wikipedia is not reliable.

01:20:36 - 01:20:40

Nevertheless, it does not seem to me that the things

01:20:40 - 01:20:43

you affirm today are very much in favor of vaccines.

01:20:43 - 01:20:46

You are in favor of the vaccination of children.

01:20:48 - 01:20:56

So we are in favor of consensus informed for all, we are not in favour of medical obligations.

01:20:56 - 01:20:59

Everything that goes against a free, informed consensus.

01:21:02 - 01:21:05

Always talk about the vaccine in general.

01:21:05 - 01:21:09

Lei, Dr. Hooker, is the author

01:21:09 - 01:21:12

of a scientific work that has

01:21:12 - 01:21:16

been published and then also declared

01:21:16 - 01:21:19

by the scientific community not credible.

01:21:19 - 01:21:23

Ahm ehm pubblicato, where the main

01:21:23 - 01:21:26

claim was that I vaccines, and

01:21:26 - 01:21:30

vaccines that if they do to

01:21:30 - 01:21:32

children also cause illness.

01:21:32 - 01:21:35

He also said it before when he asked her this question.

01:21:35 - 01:21:43

Il collega prova con malattie, tra cui l'autismo E lei è ancora convinto di questa affermazione?

01:21:46 - 01:21:49

That there is an increase in

01:21:49 - 01:21:52

evidence with more than 100 publications

01:21:52 - 01:21:55

demonstrating that there are links between

01:21:55 - 01:21:58

I and I. Vaccines, the components

01:21:58 - 01:22:01  
of vaccines for EH with autism

01:22:01 - 01:22:02  
spectrum disorders.

01:22:02 - 01:22:05  
There is no doubt that the mercury

01:22:05 - 01:22:08  
inside some vaccines are distributed. In the

01:22:08 - 01:22:12  
world that is a neurotoxin there are

01:22:12 - 01:22:14  
also other neurotoxins all within vaccines.

01:22:14 - 01:22:17  
I am continuously supporting my work, the work has

01:22:17 - 01:22:21  
been declared, not reliable, but I have not received

01:22:21 - 01:22:24  
it. There is no explanation from the publisher of

01:22:24 - 01:22:27  
the reason for which they have considered my work

01:22:27 - 01:22:27  
unreliable.

01:22:29 - 01:22:34  
In particular, they portrayed that publication.

01:22:34 - 01:22:37  
In particular, that publication will be

01:22:37 - 01:22:40  
republished in 2019 in another scientific

01:22:40 - 01:22:42

journal, in a Spanish version.

01:22:43 - 01:22:46

And when I did what publications in particular,

01:22:46 - 01:22:50

I used the same data, the same studies,

01:22:50 - 01:22:53

the same protocols that had been used previously

01:22:53 - 01:22:56

and then somehow when it was done. in

01:22:56 - 01:22:59

the United States when it was done one

01:22:59 - 01:23:03

study in the United States instead by other

01:23:03 - 01:23:07

scientists who were having a different type of

01:23:07 - 01:23:10

reliability in the United States Uniti then andava

01:23:10 - 01:23:13

bene invece da parte mia no quella che

01:23:13 - 01:23:17

ho potuto fare io sulla base di fonti

01:23:17 - 01:23:20

aperte perché in realtà la spiegazione è stata

01:23:20 - 01:23:23

data perché lei per confermare questa The hypothesis

01:23:23 - 01:23:27

of the connection between vaccination and autism has

01:23:27 - 01:23:30

cited two subsequent works, one published previously in

01:23:30 - 01:23:34

2014 on its Lancet that was later published.

01:23:34 - 01:23:37

The authors have all withdrawn their own firm

01:23:37 - 01:23:40

and the principal author. He was accused of

01:23:40 - 01:23:44

the fact that he had received money from

01:23:44 - 01:23:46

someone to write what work.

01:23:46 - 01:23:53

Therefore, all the scientific bases on which his work was based were less.

01:23:53 - 01:23:59

So, don't you think your research is not accurate enough?

01:24:03 - 01:24:06

I am not entirely in agreement

01:24:06 - 01:24:10

with what the research that has

01:24:10 - 01:24:13

been done has said and the

01:24:13 - 01:24:16

research that has been published by

01:24:16 - 01:24:19

this disease control center. Men in

01:24:19 - 01:24:22

that study were 65% more likely

01:24:22 - 01:24:26

to receive a diagnosis of autism

01:24:26 - 01:24:29

if they had been vaccinated with

01:24:29 - 01:24:30

a particular vaccine.

01:24:30 - 01:24:32

After three years of age.

01:24:32 - 01:24:33

Fifth, the overall effect.

01:24:35 - 01:24:39

Instead, it was 49% so to keep

01:24:39 - 01:24:42

this paper that has been quoted in

01:24:42 - 01:24:46

a paper that has been one of

01:24:46 - 01:24:49

the references exactly in this paper.

01:24:49 - 01:24:52

This paper in particular is here to understand this

01:24:52 - 01:24:56

needs to be returned indirectly back to the original

01:24:56 - 01:24:59

paper to the original paper at his point of

01:24:59 - 01:25:03

view but remango of my opinion. Well, especially for

01:25:03 - 01:25:06

a very simple reason that after they are out

01:25:06 - 01:25:10

these works and if it is sparsa la voce

01:25:10 - 01:25:13

both eh i neonati Kingdom and in America.

01:25:13 - 01:25:16

Of the fact that these risks of

01:25:16 - 01:25:19

autism may be present in children, many

01:25:19 - 01:25:22

parents have decided not to vaccinate themselves.

01:25:22 - 01:25:26

Children and for example in the United

01:25:26 - 01:25:29

States are increased and almost morbid, something

01:25:29 - 01:25:31

that was a radical disease.

01:25:31 - 01:25:35

Guardi President was the motivation is this

01:25:35 - 01:25:38

is the premise to do this but

01:25:38 - 01:25:41

here so siccome I think these auditions

01:25:41 - 01:25:45

put the microphone underneath. The mouth of

01:25:45 - 01:25:48

people who have anti-scientific theories is harmful,

01:25:48 - 01:25:51

I believe this Commission should not be

01:25:51 - 01:25:55

held and therefore I do not leave.

01:25:58 - 01:26:02

Ah va bene mi mandi lei sì peccato

01:26:02 - 01:26:05

que la ciencia va bene adesso we are

01:26:05 - 01:26:08

without science as facciamo va bene la.

01:26:08 - 01:26:12

Aspetta, aspetta non fermi tutti The opposition Other questions.

01:26:17 - 01:26:19

Colucci I am not in a position.

01:26:20 - 01:26:20

Please please.

01:26:22 - 01:26:24

Excuse me, please.

01:26:24 - 01:26:27

L'avrei pregato la doctressa la senatrice Zambito di rimanere

01:26:27 - 01:26:30

sul tema Covip per quanto possibile non sul tema

01:26:30 - 01:26:34

dei vaccini In general that on which we do

01:26:34 - 01:26:37

not open a tra virgolette is an issue that

01:26:37 - 01:26:40

is not the subject of in-depth consideration by the

01:26:40 - 01:26:41

Commission, please.

01:26:41 - 01:26:44

As I said at the beginning of this

01:26:44 - 01:26:47

session, not having the opportunity to follow the

01:26:47 - 01:26:50

report, I reserve to revive it in a

01:26:50 - 01:26:53

different way. in a position to ask questions

01:26:53 - 01:26:56

about such important topics and say this again,

01:26:56 - 01:26:59

I renew my bias. also by the modes

01:26:59 - 01:27:03

with which law is addressed to me by

01:27:03 - 01:27:03

personalizing it.

01:27:03 - 01:27:06

But so well that when you are lacking

01:27:06 - 01:27:09

in arguments if you use insult and violence

01:27:09 - 01:27:12

and this is his way of working very

01:27:12 - 01:27:13

well.

01:27:13 - 01:27:16

Thanks to heaven it is the web TV and where

01:27:16 - 01:27:18

do you see very well his behavior, my very patient

01:27:18 - 01:27:21

and Thank you to heaven, I renew my confidence in

01:27:21 - 01:27:23

the workers of offices who were attacked unjustly.

01:27:24 - 01:27:26

Well, on the order of work please.

01:27:27 - 01:27:30

Yes, anch'io rinnovo fiducia negli uffici e osservo

01:27:30 - 01:27:33

que noi sappiamo da diversi giorni che avremmo

01:27:33 - 01:27:37

avuto questa audizione sull'ora dipende come We depend

01:27:37 - 01:27:40

on the working hours of the two branches

01:27:40 - 01:27:43

of Parliament; we actually got information later, but

01:27:43 - 01:27:47

almost all of us have access to it.

01:27:47 - 01:27:50

17:44 somebody 17:26 at 18:45 and I expect

01:27:50 - 01:27:53

that the session if it is initiated at

01:27:53 - 01:27:56

19 per cui se il eh l'onorevole. Colucci

01:27:56 - 01:27:59

does not want to ask questions, but he

01:27:59 - 01:28:03

has all the right to do so but

01:28:03 - 01:28:06

will blame a non if he knows well

01:28:06 - 01:28:07

who.

01:28:07 - 01:28:10

I want to say that we do not know the

01:28:10 - 01:28:13

time needs fine all'ora who has learned it also him

01:28:13 - 01:28:15

ma If one has nothing to ask, more than normal.

01:28:15 - 01:28:20

I have not taken the word so many times, but I have not blamed the fact of not knowing the exact time.

01:28:21 - 01:28:23

Well, we thank you.

01:28:23 - 01:28:28

Thank you for our audits proposed, thank you for our audits.

01:28:28 - 01:28:30

The seat is closed.
