

Email to my Ohio Senators and Congressman (3/15/24):

It is important that you oppose this bill, for the reasons outlined by Matt Taibbi:

This is a free speech issue.

I also call your attention to the shameful report on the House Subcommittee on Weaponization of Government.

This, too, is a free speech (as well as privacy and government propaganda/misinformation/overreach) issue. This must stop – this abomination is an existential issue for the very survival of our democratic republic. There is no longer any effort to protect our financial transaction freedom or the financial management laws of the US. For shame.

Rand Paul and Thomas Massie seem to be the only outspoken members of Congress who make sense on these and similar issues. Please join them in raising your voice and speaking about the issues that really matter to Americans. Virtually everything else is a distraction.
