

Positive Hell 2013 - Joan Shenton

00:00:27 - 00:00:34

It was in the early 1980s that people, some of them very young, began to
they were going to die very

00:00:34 - 00:00:41

soon. This was because the antibodies in their blood had tested positive to
a so called deadly new

00:00:41 - 00:00:48

virus called hiv. Human immune virus Imagine the sudden announcement
of a plague and a death

00:00:48 - 00:00:51

sentence with no real science to support.

00:00:53 - 00:00:53

Doesn't seem possible.

00:03:09 - 00:03:15

Who would have believed that? The people we've come to meet have lived
on for 27 years and more with

00:03:15 - 00:03:22

an HIV positive diagnosis. Some of them, like physician Dr. Manuel Garrido,
have never taken any

00:03:22 - 00:03:28

antiviral drugs. He's been swimming against the tide of medical orthodoxy
for three decades.

00:03:31 - 00:03:33

Strenuous exercise. Indeed,

00:03:35 - 00:03:44

Raquel has had two children who are fit and well and are HIV negative.
Others, like Manuel, took

00:03:44 - 00:03:48

antivirals for a while and found they made him feel so ill he stopped taking them.

00:03:51 - 00:03:57

How can this be? You'll say, haven't we been told that everybody who tests positive is sure to die?

00:03:58 - 00:04:03

Do these people have a special magic gene that protects them against hiv?

00:04:05 - 00:04:09

Or could it be that this death sentence has been mistaken all along?

00:05:35 - 00:05:35

Paramin.

00:07:05 - 00:07:12

We came to meet this remarkable group of individuals in Santiago de Compostela. This town in the

00:07:12 - 00:07:18

heart of northern Spain's province of Galicia has for centuries been the destination for Christian

00:07:18 - 00:07:24

pilgrims who've trodden the well worn paths in search of a stronger faith and a spiritual awakening.

00:07:30 - 00:07:35

Our group was keen to tell us of their own long and arduous journey towards the truth about their

00:07:35 - 00:07:42

condition. Were they really going to die? Or were they the victims of a colossal medical and

00:07:42 - 00:07:43

scientific blunder?

00:07:48 - 00:07:54

In this seaside town of Cangas, where Manolo lives, young people are energetically enjoying all the

**00:07:54 - 00:07:56
summer springs pursuits.**

**00:07:59 - 00:08:06
Manolo's youth was very different. As a teenager he became involved with drugs and alcohol and then,**

**00:08:06 - 00:08:10
having tested HIV positive, he entered the AIDS zone.**

**00:08:12 - 00:08:18
When he realized that he wasn't about to die, he began to gather information from around the world,**

**00:08:18 - 00:08:25
from scientists who challenged HIV as the cause of AIDS and others who maintain that HIV has never**

**00:08:25 - 00:08:33
been isolated and that the HIV test is simply an antibody test that reacts positively when our**

**00:08:33 - 00:08:36
immune system is challenged. For different reasons.**

**00:08:40 - 00:08:46
Manolo attracted others who were in his position and he soon decided to set up a website called**

**00:08:46 - 00:08:47
Overcoming AIDS.**

**00:09:13 - 00:09:14
Methodicos.**

**00:10:05 - 00:10:06
See motivation.**

00:11:11 - 00:11:17

Our antibody profile can become raised for many reasons. Autoimmune conditions, malnutrition,

00:11:18 - 00:11:25

pathogenic assault from dirty water. Current medical orthodoxy accepts that there are over 70

00:11:25 - 00:11:31

medical conditions that can raise levels of the so called HIV antibodies and cause positive results.

00:11:32 - 00:11:38

Conditions like tb, malaria Hepatitis, intravenous drug use and even pregnancy.

00:11:40 - 00:11:42

So what does a positive test mean?

00:12:21 - 00:12:22

Yes.

00:13:20 - 00:13:26

Imagine being a young couple in love and being told, you mustn't have unprotected sex, you mustn't

00:13:26 - 00:13:29

have a child, and if you did, you mustn't breastfeed.

00:13:32 - 00:13:38

Well, Pablo and Raquel were lucky enough to have a doctor who said, just get on with your lives. And

00:13:38 - 00:13:43

this they did. They had a daughter who's now grown up. And neither Pablo nor his daughter with

00:13:43 - 00:13:46

Raquel have tested HIV positive.

00:14:10 - 00:14:18

Perosiciente cadatresanos Carados e simper.

00:15:16 - 00:15:24

Mothers and babies will not be a sacrifice to azmt. Resistance to the orthodox approach to AIDS and

00:15:24 - 00:15:31

protests about the toxicity of anti HIV drugs has been going on for decades. But the scientists in

00:15:31 - 00:15:37

the field have turned a deaf ear. What does it take to overturn an orthodoxy?

00:15:39 - 00:15:44

Well, it took 350 years for Galileo's heresy to be pardoned by the Pope.

00:16:01 - 00:16:02

Del part.

00:17:22 - 00:17:23

Propio medical.

00:19:06 - 00:19:12

The town was in festive mood in the week leading up to St. James's Day. Many were inclined to take a

00:19:12 - 00:19:15

flutter on the lottery. Would they be lucky?

00:19:18 - 00:19:24

For our group, the decision as to whether or not to take antiviral drugs felt just like a lottery.

00:19:25 - 00:19:30

Would they be lucky? Would they die if they took them? Would they live if they didn't take them?

00:19:39 - 00:19:44

Joshua Medical Inunke tomado antiviralis in no linguentro justification.

00:20:34 - 00:20:38

Some bastantes on sientos San Sientos the Personas.

00:21:55 - 00:21:56

Avia the head of the

00:21:59 - 00:22:00

Consultas.

00:22:37 - 00:22:44

The years of living in fear of death have left their mark on our group. They not only feel angry

00:22:44 - 00:22:49

about the way they've been duped, they feel a profound sense of disgust at the way they've been

00:22:49 - 00:22:50

treated.

00:23:16 - 00:23:17

Perola.

00:23:26 - 00:23:27

Mori.

00:25:02 - 00:25:08

The future of our group has felt very insecure. But they've doggedly followed along the path of

00:25:08 - 00:25:14

dissidence, giving each other strength, just as Santiago's pilgrims have over the centuries.

00:25:38 - 00:25:38

Salvador.

00:27:02 - 00:27:09

It's been the relentless search for the truth that's given our group the strength to go on. They've

00:27:09 - 00:27:13

proved the orthodox position wrong. Now it's their turn to be heard.

00:28:07 - 00:28:07

It.
