Charlie Rose: Sir James Goldsmith Interview - 15.11.94

“The idea [GATT] is to create what is known today as efficient agriculture and to impose it worldwide. If GATT succeeds and we are able to impose modern methods of agriculture worldwide, so as to bring them to the level of Canada or Australia, what will happen? 2.1 billion people will be uprooted from the land and chased into the towns throughout the world. It is the single greatest disaster [in our history] greater than any war.”
